Crisis and presents survey data on how scientists perceive and employ hypotheses He assesses cognitive factors that influence our ability to use the hypothesis and makes practical and policy recommendations for teaching and learning about it Finally Alger considers two possible futures of the hypothesis in science as the Big Data revolution looms in one scenario the hypothesis is displaced by the Big Data Mindset that forgoes understanding in favor of correlation and prediction In the other robotic science incorporates the hypotheses into mechanized laboratories guided by artificial intelligence But in his illuminating epilogue Alger envisions a third way the Centaur Scientist a symbiotic relationship between human scientists and computers
