Understanding supply chains ,2004 *Understanding Supply Chains:Concepts, Critiques, and Futures* Steve New,Roy Westbrook,2004-09-23 *Understanding Supply Chains : Concepts, Critiques, and Futures* Steve New,Roy Westbrook,2004-09-23 **Green Logistics** Alan McKinnon,Michael Browne,Anthony Whiteing,2012-12-03 As concern for the environment rises companies must take more account of the external costs of logistics associated mainly with climate change air pollution noise vibration and accidents Green Logistics analyzes the environmental consequences of logistics and how to deal with them Written by a leading team of logistics academics the book examines ways of reducing these externalities and achieving a more sustainable balance between economic environmental and social objectives It examines key areas in this important subject including carbon auditing of supply chains transferring freight to greener transport modes reducing the environmental impact of warehousing improving fuel efficiency in freight transport reverse logistics for the management of waste The new edition is completely updated throughout with new methodologies and case studies to illustrate the impact of green logistics in practice **The Oxford Handbook of Business and the Natural Environment** Pratima Bansal,Andrew J. Hoffman,2012 This Handbook discusses the main issues research and theory on business and the natural environment and how they impact on different business functions and disciplines **Sustainability in Fashion and Textiles** Miguel Angel Gardetti,Ana Laura Torres,2017-09-08 There is no doubt that the textile industry the production of clothing fabrics thread fibre and related products plays a significant part in the global economy It also frequently operates with disregard to its environmental and social impacts The textile industry uses large quantities of water and outputs large quantities of waste As for social aspects many unskilled jobs have disappeared in regions that rely heavily on these industries Another serious and still unresolved problem is the flexibility textile industry companies claim to need Faced with fierce international competition they are increasingly unable to offer job security This is without even considering the informal sector work proliferating both in developing and developed countries Child labour persists within this sector despite growing pressure to halt it Fashion demands continuous consumption In seeking to own the latest trends consumers quickly come to regard their existing garments as inferior if not useless Old items become unwanted as quickly as new ones come into demand This tendency towards disposability results in the increased use of resources and thus the accelerated accumulation of waste It is obvious to many that current fashion industry practices are in direct competition with sustainability objectives yet this is frequently overlooked as a pressing concern It is however becoming apparent that there are social and ecological consequences to the current operation of the fashion industry sustainability in the sector has been gaining attention in recent years from those who believe that it should be held accountable for the pressure it places on the individual as well as its contribution to increases in consumption and waste disposal This book takes a wide screen approach to the topic covering among other issues sustainability and business management in textile and fashion companies value chain management use of

materials sustainable production processes fashion needs and consumption disposal and innovation and design The book will be essential reading for researchers and practitioners in the global fashion business **Cybernetics and Systems** Sergio Barile,Raul Espejo,Igor Perko,Marialuisa Saviano,2018-12-07 Society is now facing challenges for which the traditional management toolbox is increasingly inadequate Well grounded theoretical frameworks such as systems thinking and cybernetics offer general level interpretation schemes and models that are capable of supporting understanding of complex phenomena and are not impacted by the passage of time This book serves the knowledge society to address the complexity of decision making and problem solving in the 21st century with contributions from systems and cybernetics A multi disciplinary approach has been adopted to support diversity and to develop inter and trans disciplinary knowledge within the shared thematic of problem solving and decision making in the 21st century Its conceptual thread is cyber systemic thinking and its realisation is supported by a wide network of scientists on the basis of a highly participative agenda The book provides a platform of knowledge sharing and conceptual frameworks developed with multi disciplinary perspectives which are useful to better understand the fast changing scenario and the complexity of problem solving in the present time
