An Intellectual Biography of Africa Francis Kwarteng, 2022-07-13 Africa is the birthplace of humanity and civilization And yet people generally don t want to accept the scientific impression of Africa as the birthplace of human civilization The skeptics include Africans themselves a direct result of the colonial educational systems still in place across Africa and even those Africans who acquire Western education particularly in the humanities have been trapped in the symptomatology of epistemic peonage These colonial educational systems have overstayed their welcome and should be dismantled This is where African agency comes in Agential autonomy deserves an authoritative voice in shaping the curricular direction of Africa Agential autonomy implicitly sanctions an Afrocentric approach to curriculum development pedagogy historiography literary theory indigenous language development and knowledge construction Science technology engineering mathematics information and communications technology STEM ICT and research and development R D both exercise foundational leverage in the scientific and cultural discourse of the kind of African Renaissance Cheikh Anta Diop envisaged Mr Francis Kwarteng has written a book that looks at some of the major distortions of African history and Africa s major contributions to human civilization In this context Mr Kwarteng joins a long list of thinkers who roundly reject the foundational Eurocentric epistemology of Africa in favor of an Afrocentric paradigm of Africa s material spiritual scientific and epistemic assertion Mr Kwarteng places S T E M and a revision of the humanities at the center of the African Renaissance and critiques Eurocentric fantasies about Africa and its Diaspora following the critical examples of Cheikh Anta Diop Ama Mazama Molefi Kete Asante Abdul Karim Bangura Theophile Obenga Maulana Karenga Mubabingo Bilolo Kwame Nkrumah Ivan Van Sertima W E B Du Bois and several others Readers of this book will be challenged to look at Africa through a critical lens Ama Mazama editor author of Africa in the 21st Century Toward a New Future There are countless books about the evolution of European intellectual thought but scarcely any that captures the pioneering contributions of Africans since the beginning of recorded knowledge in Kmet a k a Ancient Egypt Well that long drought has ended with the publication of Kwarteng s An Intellectual Biography of Africa A Philosophical Anatomy of Advancing Africa the Diopian Way Prepare to be educated Milton Allimadi author of Manufacturing Hate How Africa Was Demonized in the Media

Exporting Global Jihad Tom Smith, Hussein Solomon, 2020-06-11 This timely 2 volume edited collection looks at the extent and nature of global jihad focusing on the often exoticised hinterlands of jihad beyond the traditionally viewed Middle Eastern centre As ISIS loses its footing in Syria and Iraq and al Qaeda regroups this comprehensive account will be a key work in the on going battle to better understand the dynamics of the jihads global reality Critically examining the global

reach of the jihad in these peripheries has the potential to tell us much about patterns of both local mobilisation and local rejection of a grander centrally themed and administered jihad Has the periphery been receptive to an exported jihad from the centre or does the local rooted cosmopolitanism of the jihad in the periphery suggest a more complex glocal relationship These questions and challenges are more pertinent than ever as the likes of ISIS and many commentators attempt to globally rebrand the jihad and as the centre reasserts its claims to the exotic periphery Edited by Tom Smith Portsmouth Kirsten E Schulze LSE and Hussein Solomon UFS the two volumes critically examine the various claims of connections between jihadist terrorism in the periphery remote Islamist insurgencies of the periphery and the global jihad Each volume draws on experts in each of the geographies in question The global nature of the jihad is too often taken for granted yet the extent of the glocal connections deserve focused investigation Without such inquiry we risk a reductive understanding of the global jihad further fostering Orientalist and Eurocentric attitudes towards local conflicts and remote violence in the periphery This book will therefore draw attention to those who overlook and undermine the distinct and rich particularities of the often contradictory and cosmopolitan global jihad In many of the peripheries particularly those with intensive large scale insurgencies there is extensive international military alliance The Bush doctrine to fight them over there so we don't have to fight them over here certainly looks to be alive and well in places like Somalia the Philippines and Niger amongst many others Crucially we must ask is such reasoning sound is the threat global and if so in what way Furthermore is action in the peripheries under the guise of combating the global jihad overlooking the local issues and threatening to make a wider threat where it was otherwise contained Diagnosing nations or regions as breeding grounds or sanctuaries of global jihad carries the spectre of having to choose sides in a battle of civilisations which looms over a number of developing nations reliant on good western relations

Jihadists of North Africa and the Sahel Alexander Thurston, 2020-10-29 Offers unique insights into the inner workings of jihadist organisations over the past three decades in North Africa and the Sahel *Armed Group Structure and Violence in Civil Wars* Roos Haer, 2015-04-17 This book examines whether differences in the organizational structure of armed groups shape patterns of human rights violations in civil wars Since the end of World War II civil wars have been characterized by extremely high numbers of civilian casualties However the exact extent of civilian suffering varies across time conflict and geographic region Recently a new strand of research has emerged primarily focused on studying the dynamics underlying the variation in civilian abuse by examining the characteristics of the armed groups and how these characteristics influence the armed groups behaviour towards the civilian population With reference to principal agent theory and data on the organizational structure of more than 70 armed groups active worldwide from 1989 onwards the author's analysis functions both on the level of the armed group and on the level of the individual via personal interviews with combatants Offering a unique insight into how factors such as recruitment methods hierarchy and organizational commitment may affect the likelihood of civilian abuse by combatants this book will be of much interest to students of

political violence civil wars war and conflict studies security studies and IR in general
