Research Universities in Africa

From the early 2000s, a new discourse emerged, in Africa and the international donor community, that higher education was important for development in Africa. Within this 'zeitgeist' of converging interests, a range of agencies agreed that a different, collaborative approach to linking higher education to development was necessary. This led to the establishment of the Higher Education Research and Advocacy Network in Africa (Herana) to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa. This book is the final publication to emerge from the Herana project. The project has also published more than 100 articles, chapters, reports, manuals and datasets, and many presentations have been delivered to share insights gained from the work done by Herana. Given its prolific dissemination, it seems reasonable to ask whether this fourth and final publication will offer the reader anything new. This book is certainly different from previous publications in several respects. First, it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project. Second, previous books and reports were published mid-project. This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large-scale project. For the first time, some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees. Different does not necessarily mean new. An emphasis on the 'newness' of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor-funded project. Rather, each chapter in this book brings, to a lesser or greater extent, something new to our understanding of universities, research and development in Africa.

Strengthening Postgraduate Supervision

An excellent collection of diverse and deeply reflective perspectives. All offer insights into the multiple challenges confronted in improving the quality and depth of postgraduate supervision, increasing throughput, and dealing with complexity. What is also affirmed is the importance of individual capability in supervision that is developed and nurtured over time, and through arduous effort. The book will be of value to novice supervisors and to more experienced ones. Policy makers, planners and administrators looking to enlarge their understanding of the postgraduate terrain in all its complexities will find the mix of theoretical and practical lenses through which the topic is approached particularly illuminating. - Professor Narend Bajjnath, Chief Executive Officer, Council on Higher Education

The Origin and Growth of Geography as a discipline at South Africa Universities

The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times, and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

ICEL 2017 - Proceedings of the 12th International Conference on e-Learning Laurie O. Campbell, Richard Hartshorn, 2017

Doctoral Education in South Africa Cloete, Nico, Mouton, Johann, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics, rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

Electrode Materials for Energy Storage and Conversion Mesfin A. Kebede, Fabian I. Ezema, 2021-11-16 This book provides a comprehensive overview of the latest developments and materials used in electrochemical energy storage and conversion devices including lithium ion batteries, sodium ion batteries, zinc ion batteries, supercapacitors and conversion materials for solar and fuel cells. Chapters introduce the technologies behind each material in addition to the fundamental principles of the devices and their wider impact and contribution to the field. This book will be an ideal reference for researchers and individuals working in industries based on energy storage and conversion technologies across physics, chemistry and engineering.

FEATURES Edited by established authorities with chapter contributions from subject area specialists. Provides a comprehensive review of the field. Up to date with the latest developments and research.

Editors Dr Mesfin A Kebede obtained his PhD in Metallurgical Engineering from Inha University, South Korea. He is now a principal research scientist at Energy Centre of Council for Scientific and Industrial Research CSIR, South Africa. He was previously an assistant professor in the Department of Applied Physics and Materials Science at Hawassa University, Ethiopia. His extensive research experience covers the use of electrode materials for energy storage and energy conversion.

Prof Fabian I Ezema is a professor at the University of Nigeria, Nsukka. He obtained his PhD in Physics and Astronomy from University of Nigeria, Nsukka. His research focuses on several areas of materials science with an emphasis on energy applications, specifically electrode materials for energy conversion and storage.
