Educational Effectiveness and Ineffectiveness Jaap Scheerens, 2015-11-20 This book is a critical assessment of the knowledge base on educational effectiveness covering a period of five decades of research It formulates a lean theory of good schooling and identifies and explains instances of ineffectiveness such as low effect sizes of malleable conditions for which expectations are highly strung The book presents a systemic outlook on educational effectiveness and improvement as it starts out from an integrated multi level model that comprises system level school level and instructional conditions It offers a classification of school improvement strategies and scenarios for system level educational improvement Above all the analysis is very systematic comprehensive and strongly grounded in theory The book includes a case study analysis of various strands of improvement oriented educational policy in the Netherlands as an illustration of some of the arguments used

Equity and Quality Dimensions in Educational Effectiveness Leonidas Kyriakides, Bert Creemers, Evi Charalambous, 2018-01-03 This book aims to make a contribution to the theory research and practice on quality and equity in education by providing a comprehensive overview of these two dimensions of educational effectiveness and proposing a methodological instrument that may be used to measure the contribution that each school can make to promoting equity The importance of using this instrument is demonstrated by analysing results of various effectiveness studies conducted over the last decade The book draws upon research across the world especially research conducted in the Europe the United States and Australasia It is shown that promoting equity has no negative effect on the promotion of quality The importance of using this methodological instrument to identify factors that promote both quality and equity at different educational levels i e teacher school and educational system is stressed The book also demonstrates how we can measure stability and changes in the effectiveness status of schools over time in terms of fostering quality and equity In addition it underlines the importance of identifying factors measuring changes in the effectiveness status of schools in terms of equity and points to the alternative strategies that can be used at school and system level In our attempt to encourage the further development and use of this methodology for school improvement purposes we demonstrate how experimental studies can be conducted to discover whether and under which conditions the proposed methodology can help schools promote both quality and equity Finally implications for school evaluation research educational policy and practice are drawn In this way the book contributes significantly to the debate on how quality and equity can be achieved and encourages policy makers and practitioners not to view these two dimensions of effectiveness as being in competition with each other but as constituting the major objectives of any reform policy and or improvement effort at school and or national levels

Educational Effectiveness Theory Katharina Maag Merki, Marcus Emmerich, Monika Holmeier, 2018-10-11 Despite the advances in educational effectiveness theory and methodology in the last 20 years important questions and issues remain unresolved In particular existing theoretical frameworks of educational effectiveness are only able to describe the interrelationship among factors at the system school classroom and student levels and their cross level interdependency in a very general manner Additionally although a large number of studies provide empirical evidence of the impact of single factors and factor constellations on student learning the embedding of the empirically identified results in theoretical models of educational effectiveness has to be carried out more systematically in order to develop more elaborated theories of educational effectiveness The aim of this book is to contribute to the advancement of educational effectiveness theory by discussing different strategies including alternative theoretical models to understand educational effectiveness extending the methodology to analyze processes and mechanisms of educational effectiveness analyzing differential effects of processes and instruments on educational effectiveness carrying out complex multivariate analyses considering manifest and latent variables and combining theory and practice in real school situations Taken together the strategies presented in this book make it clear that the advancement of educational effectiveness theory depends on the advancement of educational effectiveness methodology or in other words from theory to methodology and from empirical evidence back to theory This book was originally published as a special issue of School Effectiveness and School Improvement On Effectiveness

Giorgio Ausenda, 2003 The purpose of this volume is to examine and explicate both the concept and the quantification of the parameter effectiveness considered indispensable for the evaluation of the increasing typology of operations whose success cannot be measured by profit Eight papers and the discussions thereof are included **BOOK JACKET**
