Trigonometry with the Calculator

You have learned about sin, cos, and tan, each is a fraction you can write using the sides of a right triangle. But what if you don't know one of those sides? That is where the calculator can help you.

We are still going to use SOHCAHTOA to help us. But we need to practice using the calculator before we get to solving any problems.

First you need to check that your calculator is in the right mode. It should be in degree mode. Try entering $\sin 30^\circ$. If you get 0.5 you are in the right mode. Otherwise you need to change it.

After you are sure that you are in degree mode we are ready to start. Your calculator has information stored into it for every possible angle measure. Enter each of these into your calculator.

1. $\cos 45^\circ$ _____ 2. $\sin 28^\circ$ _____ 3. $\tan 10^\circ$ _____ 4. $\sin 88^\circ$ _____

We could keep entering values all day and your calculator would know the answer. (But don't worry, we won't.)

Now we will do a couple of examples of how to use the calculator to solve for a missing side. Here are the steps you need to use:

1. Mark the angle that you are going to use for this problem (usually the one that you are given - careful! don't use the right angle!)
2. Label the sides in relation to the angle that you are going to use (opposite, adjacent, hypotenuse)
3. Circle the sides you are going to use to make a trig function.
4. Decide which trig function you can make with those sides (sin, cos, or tan).
5. Write the equation, using a variable for the missing side.
6. Solve the equation for the missing side. (using algebra steps)

Here are a few examples:

EX1 Find x .

1. Mark angle A (since it is the one that we know a measure for)
2. Label the sides in relation to angle A (opp., hyp.)
3. Circle those sides.
4. Decide which trig function you can make with Opp., Hyp. (sin)
5. Write the equation, using the variable x for the missing side.
6. Solve the equation for x , using algebra.

New Syllabus Mathematics Workbook Express is written in line with the new Singapore Cambridge GCE O Level Examination and the new initiatives of the Ministry of Education. The workbook consists of exercises which prepare students for their examinations. The more difficult questions are marked with an 'A' to encourage student centred learning. The workbook includes non routine types of worksheets that are classified under the section Alternative Assessment. These worksheets encourage students to learn independently through carefully guided steps and the use of IT. Students are motivated to investigate mathematical concepts with various methods and think critically so that they will understand and appreciate the concepts better. The teacher can gauge the students learning by assessing the work with the scoring rubric found at the end of the relevant worksheets. The workbook is accompanied with a CD ROM that contains templates to be used with some worksheets. It is hoped that with the use of various pedagogies different types of students will be inspired to achieve success in mathematics. *Resources in Education*, 1995 *Becoming an Outstanding Mathematics Teacher* Jayne Bartlett, 2013-07-24
Raising standards in mathematics is high on government education agendas and remains a key priority for schools. Schools strive to provide an outstanding education for their pupils preparing them to compete not only in a national but an international market. At the heart of this is the classroom and the classroom teacher. So how do you plan lessons that engage and motivate students and what makes a mathematics lesson outstanding? *Becoming an Outstanding Mathematics Teacher* aims to help teachers develop approaches to teaching and learning that take into account individual students needs and abilities to best facilitate learning. Taking a fresh approach it offers a wide range of techniques for planning lessons that allow them to use current resources including themselves in a more innovative way to produce outstanding results. With a strong focus on activating learning and supporting pupils as they connect mathematical concepts and processes and develop their individual learning journeys the book covers a step by step approach to planning for learning. Assessment for learning and planning for progress. Developing effective questioning strategies to promote thinking skills in pupils. Techniques for differentiation to ensure all pupils make progress. Using the classroom environment to develop a culture of learning. Packed full of practical strategies and activities that are easy to implement and including sample lesson plans this timely new book is essential reading for newly qualified and experienced mathematics teachers that want to ensure
