Treatise on Basic Philosophy: Volume 6 Mario BUNGE,1983-08-31 Treatise on Basic Philosophy: Volume 6 Mario BUNGE,2014-10-09 Treatise on Basic Philosophy: Volume 6 M. Bunge,2013-12-01 **Treatise on Basic Philosophy** M. Bunge,2012-12-06 The purpose of this Introduction is to sketch our approach to the study of value morality and action and to show the place we assign it in the system of human knowledge 1 VALUE MORALITY AND ACTION FACT THEORY AND METATHEORY We take it that all animals evaluate some things and some processes and that some of them learn the social behavior patterns we call moral principles and even act according to them at least some of the time An animal incapable of evaluating anything would be very short lived and a social animal that did not observe the accepted social behavior patterns would be punished These are facts about values morals and behavior patterns they are incorporated into the bodies of animals or the structure of social groups We distinguish then the facts of valuation morality and action from the study of such facts This study can be scientific philosophic or both wayan animal evaluates environmental A zoologist may investigate the or internal stimuli a social psychologist may examine the way children learn or fail to learn certain values and norms when placed in certain environments And a philosopher may study such descriptive or explanatory studies with a view to evaluating valuations moral norms or behavior patterns he may analyze the very concepts of value morals and action as well as their cognates or he may criticize or reconstruct value beliefs moral norms and action plans **Epistemology & Methodology III: Philosophy of Science and Technology Part I: Formal and Physical Sciences** M. Bunge,2012-12-06 The aims of this Introduction are to characterize the philosophy of science and technology henceforth PS T to locate it on the map of learning and to propose criteria for evaluating work in this field 1 THE CHASM BETWEEN S T AND THE HUMANITIES It has become commonplace to note that contemporary culture is split into two unrelated fields science and the rest to deplore this split and to do is some truth in the two cultures thesis and even nothing about it There greater truth in the statement that there are literally thousands of fields of knowledge each of them cultivated by specialists who are in most cases indifferent to what happens in the other fields But it is equally true that all fields of knowledge are united though in some cases by weak links forming the system of human knowledge Because of these links what advances remains stagnant or declines is the entire system of S T Throughout this book we shall distinguish the main fields of scientific and technological knowledge while at the same time noting the links that unite them *Epistemology & Methodology I:* Mario BUNGE,1983-08-31 In this Introduction we shall state the business of both descriptive and normative epistemology and shall locate them in the map of learning This must be done because epistemology has been pronounced dead and methodology nonexistent and because when acknowledged at all they are often misplaced 1 DESCRIPTIVE EPISTEMOLOGY The following problems are typical of classical epistemology i What can we know ii How do we know iii What if anything does the subject contribute to his knowledge iv What is truth v How can we recognize truth vi What is probable knowledge as opposed to

certain knowledge vii Is there a priori knowledge and if so of what viii How are knowledge and action related ix How are knowledge and language related x What is the status of concepts and propositions In some guise or other all of these problems are still with us To be sure if construed as a demand for an inventory of knowledge the first problem is not a philosophical one any more than the question What is there But it is a genuine philosophical problem if construed thus What kinds of object are knowable and which ones are not However it is doubtful that philosophy can offer a correct answer to this problem without the help of science and technology For example only these disciplines can tell us whether man can know not only phenomena appearances but also noumena things in themselves or self existing objects **Epistemology &**

The Laws of Scientific Change Hakob Barseghyan,2015-08-17 This book systematically creates a general descriptive theory of scientific change that explains the mechanics of changes in both scientific theories and the methods of their assessment It was once believed that while scientific theories change through time their change itself is governed by a fixed method of science Nowadays we know that there is no such thing as an unchangeable method of science the criteria employed by scientists in theory evaluation also change through time But if that is so how and why do theories and methods change Are there any general laws that govern this process or is the choice of theories and methods completely arbitrary and random Contrary to the widespread opinion the book argues that scientific change is indeed a law governed process and that there can be a general descriptive theory of scientific change It does so by first presenting meta theoretical issues divided into chapters on the scope possibility and assessment of theory of scientific change It then builds a theory about the general laws that govern the process of scientific change and goes into detail about the axioms and theorems of the theory

Modernity and the Ideals of Arab-Islamic and Western-Scientific Philosophy A. Z. Obiedat,2022-07-08 This is the first study to compare the philosophical systems of secular scientific philosopher Mario Bunge 1919 2020 and Moroccan Islamic philosopher Taha Abd al Rahman b 1945 In their efforts to establish the philosophical underpinnings of an ideal modernity these two great thinkers speak to the same elements of the human condition despite their opposing secular and religious worldviews While the differences between Bunge s critical realist epistemology and materialist ontology on the one hand and Taha s spiritualist ontology and revelational mystical epistemology on the other are fundamental there is remarkable common ground between their scientific and Islamic versions of humanism Both call for an ethics of prosperity combined with social justice and both criticize postmodernism and religious conservatism The aspiration of this book is to serve as a model for future dialogue between holders of Western and Islamic worldviews in mutual pursuit of modernity s best case scenario
