Trees On Mars Our Obsession With The Future:

Trees on Mars Hal Niedzviecki, 2015-10-20 The future is big right now for perhaps the first time our society is more focused on what is going to happen in the future than what is happening right now In *Trees on Mars Our Obsession with the Future* cultural critic and indie entrepreneur Hal Niedzviecki asks how and when we started believing we could and should create the future What is it like to live in a society utterly focused on what is going to happen next Through visits to colleges corporations tech conferences factories and more Niedzviecki traces the story of how owning the future has become irresistible to us In deep conversation with both the beneficiaries and victims of our relentless obsession with the future Niedzviecki asks crucial questions Where are we actually heading How will we get there And whom may we be leaving behind

Time and Environmental Law Benjamin J. Richardson, 2017-08-03 Disciplined by industrial clock time modern life distances people from nature s biorhythms such as its ecological evolutionary and climatic processes The law is complicit in numerous ways It compresses time through fast track legislation and accelerated resource exploitation It suffers from temporal inertia such as grandfathering existing activities that limits the law s responsiveness to changing circumstances Insouciance about past ecological damage and neglect of its restoration are equally serious temporal flaws we cannot live sustainably while Earth remains degraded and unrepaired Applying international and interdisciplinary perspectives on these issues *Time and Environmental Law* explores how to align law with the ecological timescape and enable humankind to tell nature s time Lending insight into environmental behaviour and impacts this book pioneers a new understanding of environmental law for all societies and makes recommendations for its reform Minding nature not the clock requires regenerating Earth adapting to its changes and living more slowly

Akhtar-Khavari,Benjamin J. Richardson,2019-01-25 Ecological restoration is as essential as sustainable development for the health of the biosphere Restoration however has been a low priority of most countries environmental laws which tend to focus narrowly on rehabilitation of small discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes Through critical theoretical perspectives and topical case studies this book's diverse contributors explore a more ambitious agenda for ecological restoration law Not only do they investigate current laws and other governance mechanisms they also consider the philosophical and methodological bases for the law to take ecological restoration more seriously Through exploration of themes relating to time space geography semiotics social justice and scientific knowledge this book offers innovative and critical insights into ecological restoration law *Her Invisible Spirit Mate* Kate Elizabeth (Perkins) Glass ("Mrs. C.
