*States and Creative States (2 Volume Set)* John Adlam, Tilman Kluttig, Bandy Lee, 2018-05-03 This is a provocative collection exploring the different types of violence and how they relate to one another examined through the integration of several disciplines including forensic psychotherapy psychiatry sociology psychosocial studies and political science By examining the violent states of mind behind specific forms of violence and the social and societal contexts in which an individual act of human violence takes place the contributors reveal the dynamic forces and reasoning behind specific forms of violence including structural violence and conceptualise the societal structures themselves as violent states Other research often stops short at examining the causes and risk factors for violence without considering the opposite states that may not only mitigate but allow for a different unfolding of individual and societal evolution As a potential antidote to violence the authors prescribe an understanding of these creative states with their psychological origins and their importance in human behaviour and meaning seeking Making a call to move beyond merely mitigating violence to the opposite direction of fostering creative potential this book is foundational in its capacity to cultivate social consciousness and effect positive change in areas of governance policy making and collective responsibility This two volume set includes Volume 1 Structural Violence and Creative Structures ISBN 9781785925641 Volume 2 Human Violence and Creative Humanity ISBN 9781785925658

Architecture Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic **Orientalism in French Classical**

His experiments with free planning and dynamic interior space continued in his native Germany through the difficult wartime years from which he emerged with renewed energy and a consolidated architectural philosophy. As an important exponent of Organic Architecture, Scharoun developed a radical new kind of architectural space and his disdain for imposed form and emphasis on open-minded discovery have proved increasingly influential among a younger generation of architects. Peter Blundell Jones's exhaustive study provides a comprehensive overview of Scharoun's life and work and explores his theoretical stance in relation to contemporaries such as Hugo Haring, Mies van der Rohe and Le Corbusier. Generously illustrated throughout with plans and drawings and specially commissioned photographs by Dennis Gilbert, this book presents a timely re-evaluation of Scharoun's unique contribution to architectural theory and design. *Atisbos*, 1975 *Paragraph*, 2004 *Select Papers*, 1995 **Lévi-Strauss Today** Robert Delière, 2004-09-04 This book provides a concise overview of the monumental work of the greatest and most prolific thinkers of the 20th century. Claude Lévi-Strauss has had a profound and lasting impact on the course of contemporary anthropology. □□□□ □□□□□□□□. □□□, 1995
