Trees Maps And Theorems Effective Communication For Rational Minds:

Trees, Maps, and Theorems Jean-Luc Doumont, 2009 *Strategic Thinking in Complex Problem Solving* Arnaud Chevallier, 2016-07-06 Strategic Thinking in Complex Problem Solving provides readers with practical tools to help them solve complex problems Based on theoretical and empirical evidence from many disciplines this book breaks down the resolution process into four easy to follow steps and provides concrete guidelines to help anyone who is confronted with an unfamiliar challenging problem requiring significant analysis

MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions Reinout Roels, 2019-05-27 Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study observations a survey and the programmatic analysis of over 12000 PowerPoint documents The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well integrated solutions for the identified shortcomings The resulting MindXpres platform consists of a new conceptual framework content model information system and presentation engine We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof of concept plug in solutions for the identified shortcomings and unmet user needs

The Craft of Scientific Presentations Michael Alley, 2013-06-21 The Craft of Scientific Presentations 2nd edition aims to strengthen you as a presenter of science and engineering The book does so by identifying what makes excellent presenters such as Brian Cox Jane Goodall Richard Feynman and Jill Bolte Taylor so strong In addition the book explains what causes so many scientific presentations to flounder One of the most valuable contributions of this text is that it teaches the assertion evidence approach to scientific presentations Instead of building presentations as most engineers and scientists do on the weak foundation of topic phrases and bulleted lists this assertion evidence approach calls for building presentations on succinct message assertions supported by visual evidence Unlike the commonly followed topic subtopic approach that PowerPoint leads presenters to use the assertion evidence approach is solidly grounded in research By showing the differences between strong and weak presentations by identifying the errors that scientific presenters typically make and by teaching a much more powerful approach for scientific presentations than what is commonly practiced this book places you in a position to elevate your presentations to a high level In essence this book aims to have you not just succeed in your scientific presentations but excel About the Author Michael Alley has taught workshops on presentations to engineers and scientists on five continents and has recently been invited to speak at the European Space Organization Harvard Medical School MIT Sandia National Labs Shanghai Jiao Tong University Simula Research Laboratory

and United Technologies An Associate Professor of engineering communication at Pennsylvania State University Alley is a leading researcher on the effectiveness of different designs for presentation slides Emote Vikas Gopal

Jhingran,2014-03-25 From being so inept at public speaking that his supervisor wouldn't let him make presentations to clients even when he had done all the work Vikas Jhingran went on to become a championship winning public speaker who leaves a lasting impact on his audience Few speakers and presenters understand speeches or presentations at a fundamental level Most books have an overly prescriptive approach using the tricks and tools of speech delivery that end up confusing the speech instead of connecting with the essential part of speaking that which engages listeners In Emote Vikas Jhingran lays bare his unique approach connecting with his audience on an emotional level rather than subscribing to a right way of speaking which applies equally to one on one conversations small team settings and large audiences His method will show you how to express your ideas clearly quell your fear of public speaking calm the sweating stuttering and jitters that plague people before crucial presentations and overall help you become an effective communicator **2010 [catalog]**

Degruyter,2010-12-16 Reviews are an important aspect of scholarly discussion because they help filter out which works are relevant in the yearly flood of publications and are thus influential in determining how a work is received The IBR published again since 1971 as an interdisciplinary international bibliography of reviews it is a unique source of bibliographical information The database contains entries on over 1.2 million book reviews of literature dealing primarily with the humanities and social sciences published in 6,820 mainly European scholarly journals Reviews of more than 560,000 scholarly works are listed The database increases every year by 60,000 entries Every entry contains the following information On the work reviewed author title On the review reviewer periodical year edition page ISSN language subject area in German English Italian Publisher address of journal
