

wheels and a paint scheme harking back to the 1960s. A factory custom version, the America, followed in 2002.

From a standing start in 1991, the Hinckley factory was competing in all the major motorcycle market sectors. Much bigger production volumes meant the original modular concept was no longer a necessity. By the dawn of the 21st Century Triumph had sold over 100,000 motorcycles. Then the factory was struck by one of the biggest fires ever at a British industrial site. In March 2002 the production line, moulding shop and stores were destroyed and many other parts of the plant severely damaged. Just six months later the rebuilt factory was running at full capacity. The first new product out of the doors was the Daytona 600, a replacement for the TT500. Where the first Supersports 600 Triumph had failed to compete with the Japanese this one was good enough to win an Isle of Man TT.

Development of the Bonneville family continued, with derivatives in the form of the T100 and the custom styled Speedmaster being introduced for the 2003 model year. With the introduction of the Thruxton in 2004, the original 700 cc engine got a 4 mm overbore to increase its capacity to 865 cc. The Thruxton, named after the small 1955 run of hot Bonnie's for production race homologation, is styled along the lines of a modern café racer. The Speedmaster and T100 benefited from the 865 cc engine from 2005. Next on Hinckley's resurrection list was the Scrambler which harks back to the models originally designed for the US market with both pipes sweeping at high level down the right-hand side of the bike and high, off-road style fairs.

The nicely differentiated range was now well established: Triumph call the Dayonas, Sprites and Tiger 'Urban Sports' while the Bonneville and its derivatives are billed as 'Modern

Thruxton

Classics". With an eye on America Triumph then unleashed their most outrageous bike yet: the Rocket III. (Whisper it, but Rocket III was actually a BSA model name back in the 1970s.) They call it a cruiser but behemoth would be a better description, it's the first production bike to boast a capacity of over two litres and the only thing on the roads that can make a Harley V-Rod look shy and retiring.

Triumph has gone from hesitant newcomer (or should that be resurmer?) to a player on the world motorcycling stage. To anyone who remembers the state of the British industry when the original Triumph factory closed its doors, that is nothing short of a miracle.

About this manual

The aim of this manual is to help you get the best value from your motorcycle. It can do so in several ways. It can help you decide what work must be done, even if you choose to have it done by a dealer; it provides information and

procedures for routine maintenance and servicing; and it offers diagnostic and repair procedures to follow when trouble occurs.

We hope you use the manual to tackle the work yourself. For many simpler jobs, doing it yourself may be quicker than arranging an appointment to get the motorcycle into a dealer and making the trips to leave it and pick it up. More importantly, a lot of money can be saved by avoiding the expense the shop must pass on to you to cover its labour and overhead costs. An added benefit is the sense of satisfaction and accomplishment that you feel after doing the job yourself.

References to the left or right side of the motorcycle assume you are sitting on the seat, facing forward.

We take great pride in the accuracy of information given in this manual, but motorcycle manufacturers make alterations and design changes during the production run of a particular motorcycle of which they do not inform us. No liability can be accepted by the authors or publishers for loss, damage or injury caused by any errors in, or omissions from, the information given.
