

a RFI process. Each RFI may be handled by separate letter, by pre-printed forms, or on the daily QC report, as mutually agreed. The questions should be specific and clearly presented. The answers should be documented as mutually agreed. When the contractor notes a discrepancy, a recommended solution should be included with the RFI. The prime contractor has the responsibility to coordinate the work of all the subcontractors and suppliers. When a subcontractor or supplier submits a RFI, the prime contractor has to review the request and coordinate it among his offices and with other firms. Under no circumstance should the RFI be passed to the Government without this coordination being accomplished. For design-build contracts the designer of record must answer RFI's concerning the contractor's design and extensions of design required by the plans and specifications.

- C. **Contractor Furnished Designs:** In addition to the need for coordination review of Government furnished plans and specifications, the QC Manager must review contractor furnished designs.

Examples are:

- **Design-Build:** In this type of contract, the contractor's QC efforts must include design quality control. The QC plan must include details of reviews to be implemented to ensure that the design will comply with the criteria provided. Some quality is also defined in the Government's Request For Proposals (RFP).
- **Extensions of Design:** Many contracts contain requirements for the contractor to provide designs such as pre-engineered metal buildings, fire alarm and protection systems, cathodic protection, etc. It becomes critical that the contractor designs are coordinated with all other aspects of the project so that proper interfaces are maintained. Where extensions of the design are required (structural steel details, concrete reinforcement drawings, etc.) by the contractor, subcontractors, or suppliers they must be coordinated with other activities. This coordination review is performed with other contractually required submittal reviews.

- D. **Value Engineering Change Proposal (VECP):** The Government's value engineering program is based on a partnering philosophy. It recognizes that the Government and the contractor share common goals and that, by working together in a spirit of cooperation, we can produce a quality facility while saving the taxpayer money. The QC Manager should review any VECP to assure proper coordination with all affected elements of the
