Use What You Have Resolving The Hiv Or Aids Pandemic:

Use What You Have: Resolving the HIV/AIDS Pandemic Roger W. Hoerl and Presha E. Neidermey, 2009-07-16 With over 25 million dead AIDS has pounced on the world like a medieval plague ranking among the greatest killers in history. Despite billions of international aid dollars the development of effective medical treatments for HIV the virus that causes AIDS and the efficacy of condoms in preventing the spread of HIV during sex 6 000 people are dying daily and over 15 million orphans have been left behind. Perhaps most surprisingly many educated westerners are only vaguely aware of AIDS as a disease threatening gays or Africans and do not believe it has any relevance for them. Few have noticed the feminization of AIDS taking AIDS from a disease primarily infecting gay men to one infecting more women than men. Women are at the forefront of the fight against AIDS in many parts of the world nowhere more so than in Sub Saharan Africa. The authors of this book make a clear case that HIV and AIDS form the most critical crisis facing the human race in this century by providing the reader a deeper understanding of the root causes of and plausible solutions for the AIDS pandemic. They include several engaging human interest stories of real people impacted by AIDS.

Excerpts from the foreword to the book written by Dr Helga Holst CEO of McCord Hospital in Durban South Africa are given below. It was in Boston on February 10 2003 that the Sinikithemba Choir from Durban South Africa performed at the opening of the Tenth Conference on Retroviruses and Opportunistic Infections CROI and shared the stage with the keynote speaker President Bill Clinton. This Zulu choir of HIV positive men and women were part of a much larger group of mostly infected women who worked together at McCord Hospital on beadwork projects to support their medical care and who sang as they worked. They used what they had their powerful and beautiful voices to bring hope unity and resources to their communities. One of the choir members a beautiful and eloquent young woman shared the poignant story of her own journey with AIDS and brought tears to the eyes of many of the world s top scientists researchers and clinicians as they were reminded of why they had committed their lives to finding the answers to this devastating disease. She shared what she had her own story and it impacted the hearts of thousands. By the time I took up the position of Medical Superintendent at McCord Hospital in Durban in 1993 AIDS was more common but there was still no affordable treatment available. In the mid 1990 s we started several social support programs of which the income generating beadwork projects were one. Social clubs consisting mostly

of women were formed They supported each other through times of hardship illness and death and cared for the children The Zulu people amongst whom we work have been gifted by the most beautiful voices The women would often sit in the parking areas at the hospital between the cars with their hands speedily busy on beadwork orders chatting and laughing while keeping a

Addressing the Sexually Transmitted Infections Epidemic in the United States: A Sociomedical Perspective Christopher Williams, Laura Skrip, Darren Whitfield, Keith L. Gray, 2023-12-04

Rates of sexually transmitted infections STIs have significantly increased in the United States Per capita estimates reveal approximately 68 million prevalent and 26 million incident STIs nationally Gonorrhea syphilis and chlamydia the three reportable STIs reached levels not seen in the last fifty years and this resurgence is concurrent with increasing antimicrobial resistance and a dearth of viable candidates in the vaccine pipeline A seminal report by the National Academies of Sciences Engineering and Medicine Sexually Transmitted Infections Adopting a Sexual Health Paradigm confirms that STIs rank among the most pressing and intractable public health threats Furthermore rising rates of STIs exact a substantial societal medical and economic burden that strain public health capacity which has been substantially debilitated in the wake of the Covid 19 pandemic STIs can have serious consequences for sexual reproductive and overall health Untreated syphilis for instance is directly implicated in neurological cardiovascular and dermatological disease Human papillomavirus is a known cause of cervical cancer and is the most common cancer among women globally Hepatitis B increases risk for cirrhosis and primary liver cancer Despite reductions in HIV transmission and improvements in prevention and treatment infections among women girls adolescents and mother to child transmission remain unacceptably high Marginalized racial ethnic minorities LGBTQ persons vulnerable at risk adolescents and young adults and other underrepresented populations are more susceptible to STIs as they negotiate an array of factors that can delay and even preclude access to preventive interventions The United States spends substantially more on STI prevention and treatment yet it consistently bares a disproportionate burden of sexually transmitted infections compared to other Western industrialized nations Access to healthcare erosion and diversion of public health capacity racism discrimination stigma substandard education and poverty have all been identified as important contributors to the trajectory of acute sexually transmitted infections Furthermore upstream drivers such as national state and local public health policies have been associated with population level STI risk prevention and treatment and as such offer opportunities for ecological observational and multi level analyses to assess their direct and indirect impact on sexual health outcomes In this thematic collection we aim to present an interdisciplinary collection of high quality articles centered on the premise that the rise of emerging and re emerging STIs can be attributed in part to a complex interaction of

Corporate and Employment Perspectives in a Global

Business Environment Boel Flodgren,2006-01-01 In today s society the foreground of deliberation in politics legislation judicial decisions even war is increasingly experienced by citizens as a mask for the working out of norms and institutions the precise nature of which eludes us We are accustomed to looking behind every news item often feeling that the real decisions

are made by other people than those who seem to be in power or that events are merely driven by facts on the ground or unconscious motives To consider global business activity and especially employment issues in this experiential context is a daring and provocative challenge one which was taken up in August 2004 under the sponsorship of the Department of Business Law at Lund University This remarkable book presents a rich sampling of what was said at that unique symposium among a group of notable authorities in law business and international relations The seventeen authors whose contributions appear in this book bring their lucid perspectives to bear on the vital and complex issues that emerge from the contemplation of the territory where the rule of law encounters global business interests These perspectives encompass such factors as the following the role of the expert global extension of the nation state model the effect of development aid on legal systems in developing countries WTO rules and dispute settlement the most favoured nation MFN principle efforts to harmonise contract law international taxation multinational corporate behaviour the search for fair labour standards the clash of economic law and labour law corporate social responsibility and alternative dispute resolution in international trade Underlying all the essays is the insight that although there is no established global law and no global law giver yet there is no national law that is not deeply affected by the globalisation of markets Collectively these authors provide a deeper and truer vision of the real global legal regime that is rapidly taking shape The powerful impetus this book provides toward an understanding of actually developing global governance and global justice will be of great value to all who wish to see a balance struck among economic environmental and social interests in our world *Law and Global Health* Michael Freeman, Sarah Hawkes, Belinda Bennett, 2014-05-29 Current Legal Issues like its sister volume Current Legal Problems now available in journal format is based upon an annual colloquium held at University College London Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought Each colloquium examines how the external discipline is conceived in legal thought and argument how the law is pictured in that discipline and analyses points of controversy in the use and abuse of extra legal arguments within legal theory and practice Law and Global Health the sixteenth volume in the Current Legal Issues series offers an insight into the scholarship examining the relationship between global health and the law Covering a wide range of areas from all over the world articles in the volume look at areas of human rights vulnerable populations ethical issues legal responses and governance
