Data Science Applied to Sustainability Analysis Jennifer Dunn, Prasanna Balaprakash, 2021-05-11 Data Science Applied to Sustainability Analysis focuses on the methodological considerations associated with applying this tool in analysis techniques such as lifecycle assessment and materials flow analysis As sustainability analysts need examples of applications of big data techniques that are defensible and practical in sustainability analyses and that yield actionable results that can inform policy development corporate supply chain management strategy or non governmental organization positions this book helps answer underlying questions In addition it addresses the need of data science experts looking for routes to apply their skills and knowledge to domain areas Presents data sources that are available for application in sustainability analyses such as market information environmental monitoring data social media data and satellite imagery Includes considerations sustainability analysts must evaluate when applying big data Features case studies illustrating the application of data science in sustainability analyses Fish Pheromones and Related Cues P. W. Sorensen, Brian D. Wisenden, 2014-12-16 Pheromones are chemical cues that pass between members of the same species that convey specific adaptive information These cues and related chemicals whose function are less well defined are especially important to fishes because of their aquatic environments and complex behaviors Pheromones are also of increasing interest in both basic and applied aspects of fish biology because they can be used to manipulate fish behavior and may explain phenomena such as fishery collapse Fish Pheromones and Related Cues provides a timely synthesis of this growing body of research in freshwater and marine species and explores everything from how these chemical signals evolved are produced released and then processed and finally to potential applications in fish culture and conservation Fish Pheromones and Related Cues opens with a useful overview on the theory of chemical communication and definitions Chapters then progress by examining the biological importance of pheromones in inter and intra species communication the role these chemical cues play in a variety biological functions from reproduction to predation and then how they evolved and are detected and recognized by fish nervous systems Final chapters provide valuable insight into how pheromones can be measured how pheromonal disruption can explain effects of environmental pollution and lastly how they pheromones are being applied in real world efforts to culture fish species and to conserve our wild populations and control invasive species With far reaching economic evolutionary and ecological implications Fish Pheromones and Related Cues will be an essential volume for anyone working in the fields of chemical communication fish biology fisheries science aquatic conservation ecology invasive species control and aquaculture

Optimisation of Dynamic Heterogeneous Rainfall Sensor Networks in the Context of Citizen Observatories

Juan Carlos Chacon-Hurtado, 2019-11-21 Precipitation drives the dynamics of flows and storages in water systems making its monitoring essential for water management Conventionally precipitation is monitored using in situ and remote sensors In situ sensors are arranged in networks which are usually sparse providing continuous observations for long periods at fixed

points in space and due to the high costs of such networks they are often sub optimal To increase the efficiency of the monitoring networks we explore the use of sensors that can relocate as rainfall events develop dynamic sensors as well as increasing the number of sensors involving volunteers citizens This research focusses on the development of an approach for merging heterogeneous observations in non stationary precipitation fields exploring the interactions between different definitions of optimality for the design of sensor networks as well as development of algorithms for the optimal scheduling of dynamic sensors This study was carried out in three different case studies including Bacchiglione River Italy Don River U K and Brue Catchment U K The results of this study indicate that optimal use of dynamic sensors may be useful for monitoring precipitation to support water management and flow forecasting

Reelin-Related Neurological Disorders and Animal Models Laura Lossi,Adalberto Merighi,Gabriella D'Arcangelo,2017-03-14 The Reeler mutation was so named because of the alterations in gait that characterize homozygous mice Several decades after the description of the Reeler phenotype the mutated protein was discovered and named Reelin Reln Reln controls a number of fundamental steps in embryonic and postnatal brain development A prominent embryonic function is the control of radial neuronal migration As a consequence homozygous Reeler mutants show disrupted cell layering in cortical brain structures Reln also promotes postnatal neuronal maturation Heterozygous mutants exhibit defects in dendrite extension and synapse formation correlating with behavioral and cognitive deficits that are detectable at adult ages The Reln encoding gene is highly conserved between mice and humans In humans homozygous RELN mutations cause lissencephaly with cerebellar hypoplasia a severe neuronal migration disorder that is reminiscent of the Reeler phenotype In addition RELN deficiency or dysfunction is also correlated with psychiatric and cognitive disorders such as schizophrenia bipolar disorder and autism as well as some forms of epilepsy and Alzheimer s disease Despite the wealth of anatomical studies of the Reeler mouse brain and the molecular dissection of Reln signaling mechanisms the consequences of Reln deficiency on the development and function of the human brain are not yet completely understood This Research Topic include reviews that summarize our current knowledge of the molecular aspects of Reln function original articles that advance our understanding of its expression and function in different brain regions and reviews that critically assess the potential role of Reln in human psychiatric and cognitive disorders [Multimedia](#)
