counterparts in DynCorp In order to explain this disparity the book undertakes the most comprehensive analysis ever attempted on the use of violence by the employees of these firms Based on extensive empirical research it offers a credible explanation for this difference Blackwater maintained a relatively bellicose military culture that placed strong emphasis on norms encouraging its personnel to exercise personal initiative proactive use of force and an exclusive approach to security which together motivated its personnel to use violence quite freely against anyone they suspected of posing a threat Specifically Blackwater s military culture motivated its personnel to fire upon suspected threats more quickly at greater distances and with a greater quantity of bullets and to more readily abandon the people they shot at when compared to DynCorp s personnel who maintained a military culture that encouraged far less violent behaviour Utilizing the Private Security Company Violent Incident Dataset PSCVID created by the author in 2012 the book draws upon data on hundreds of violent incidents involving private security personnel in Iraq to identify trends in the behaviour exhibited by the employees of different firms Based on this rich and original empirical data the book provides the definitive study of contemporary private security personnel in the Iraq War This book will be of much interest to students of the Iraq War Private Security Companies Military Studies War and Conflict Studies and IR in general
