Handbook of Prevention and Alzheimer's Disease Yue Leng, J. Wesson Ashford, Dharma Singh Khalsa, 2024-02-15 It is almost 120 years since Alzheimer s disease AD was first reported and the concept of modifiable risk factors associated with the disease has been present from the outset Thus the idea of preventing AD is not new with reference to strategies noted as early as the 1990s This subfield of AD research has matured in recent years with the number of modifiable risk factors the AD preventome rising from the 7 initially identified to the current 12 with an estimated contribution to dementia cases worldwide of about 40% This book the Handbook of

Prevention and Alzheimer's Disease introduces physicians, scientists and other stakeholders to this subfield of AD research. It investigates the AD preventome which will continue to expand as the understanding of new factors and related biomarkers is refined. Optimizing this preventome leads to an improvement in overall brain health, an outcome which reduces the risk of developing AD and improves quality of life. The book goes on to examine other domains of prevention from vascular risk factors to social engagement and from sleep health to spirituality. If the journey to end AD can be likened to a long and arduous challenge, understanding every possible part of the overall toolkit of approaches for disease prevention and intervention is essential. Together with its companion volume on intervention, the book provides a comprehensive overview of strategies for tackling Alzheimer's disease and will be of interest to all those working in the field. The Neurodiversity Affirmative Child Autism Assessment Handbook Dr Maeve Kavanagh, Dr Anna Day, Davida Hartman, Tara O'Donnell-Killen, Jessica K Doyle, 2025-04-21. Based on new and emerging clinical research, this book is here to guide you through creating a neuro-affirmative child autism assessment process for your practice. Moving away from a deficit-based medical approach to child autism assessment, identification, this comprehensive and detailed handbook covers the most up-to-date research and best practice. Created to encourage and empower clinicians to make a paradigm shift to a more neurodiversity-affirmative approach, this book acknowledges the challenges of working within a system that is inherently deficit-based and provides practice points and clinical reflections on how to embed neurodiversity-affirmative principles in their individual practice. This handbook is essential reading for those involved in assessing as well as for those working with Autistic children more generally. Including helpful tips and methods that can be used during the identification process, this handbook also includes lived experiences of Autistic children and case studies and perspectives from an OT and SLT so clinicians can gain a much deeper understanding of the young people they are working with. It also includes guidance for post-identification support and provides a clear roadmap for what happens next.
