

About LUPO

LUPO is a multi-functional Bluetooth device for loss prevention, lost item recovery and remote control. In addition, the LUPO is designed to become a platform for the creation of new applications and comes with a software development kit (SDK) designed to enable app developers to build their own unique apps on the device.

The full range of LUPO capabilities includes:

LUPO for loss prevention

The LUPO can be set to activate anti-loss and anti-theft alerts, including audible and visible alarms and/or SMS like messages, when personal items are left behind or someone else moves them. In addition, LUPO can help to prevent data theft by automatically locking a computer when the user steps away from it, the first device of its kind to offer this service.

LUPO for recovery of lost items

LUPO can help find lost possessions through "last known location" finding and crowd-sourced updates on a map, to help recover a lost item.

LUPO for remote control

LUPO can be used as a Bluetooth remote controller for controlling a smartphone camera to take the perfect selfie or to click through presentations, which are just two apps that are built-in to LUPO.

LUPO for developers

Software developers can build their own Bluetooth applications on the LUPO platform with the LUPO SDK, allowing them to program the button and harness the built-in accelerometer for gesture control, plus its location-based and proximity detection technologies to create new and useful applications.
