This volume serves to demystify the complex ethical decision making process by its accounts of renowned researchers' ethical practices as they transpired on the ground and how they negotiated externally imposed research codes. The collection investigates and records the research practices of prominent international applied linguists from a wide variety of subdisciplines including discourse analysis, educational linguistics, heritage and minority education, language planning and policy, language and technology, literacy, second language acquisition, second and foreign language pedagogy and sociolinguistics. By problematizing research practices that draw on a range of methodologies, Ethics in Applied Linguistics Research puts front and center the urgency to prepare the next generation of applied linguists with the tools and knowledge necessary to conduct ethical research in an increasingly globalized and networked world.

Peer Interaction and Second Language Learning Jenefer Philp, Rebecca Adams, Noriko Iwashita, 2013-11-07. Peer Interaction and Second Language Learning synthesizes the existing body of research on the role of peer interaction in second language learning in one comprehensive volume. In spite of the many hours that language learners spend interacting with peers in the classroom, there is a tendency to evaluate the usefulness of this time by comparison to whole class interaction with the teacher. Yet teachers are teachers and peers are peers as partners in interaction; they are likely to offer very different kinds of learning opportunities. This book encourages researchers and instructors alike to take a new look at the potential of peer interaction to foster second language development. Acknowledging the context of peer interaction as highly dynamic and complex, the book considers the strengths and limitations of peer work from a range of theoretical perspectives. In doing so, Peer Interaction and Second Language Learning clarifies features of effective peer interaction for second language learning across a range of educational contexts, age spans, proficiency levels and classroom tasks and settings.
