## Safety belts

All vehicle occupants, including those in the rear, must buckle up – even if it's just a short trip. For the best possible protection by the seat belts and airbags, the seat position must be close to the steering wheel or the instrument panel. Keep the seats in an upright position and make sure that the belts are fixed properly to the height of you and your passengers. Keep your feet on the floor at all times.

## Safety belt position/head restraint position

The shoulder belt must rest over the middle of the shoulder. The top portion of the safety belt must fit snugly across the pelvis. Both portions of the safety belt must fit tightly. The upper edge of the head restraint should be at eye level or higher.

## Seat position and distance to steering wheel

Always adjust the driver's seat to the steering wheel so that there is a minimum of 10 inches (25 cm) between your kneecaps and the steering wheel. Otherwise, the airbag system cannot protect you properly in the event of an accident and can increase your risk of serious personal injury and death.

## Safety belt height adjustment

Make the adjustment up/down to adjust the height. After you've adjusted the safety belt height, pull on the belt one more time to make sure the adjuster is locked into place.

*Note:* Always check the seat belt height adjustment markings and other important information about proper adjustment and making the belt adjuster work properly. Failure to properly use certain features may cause serious personal injury and/or death.

*Note:* Always make sure the child safety seat is properly installed. Children 12 years old and younger must sit in the rear seat and, unless specifically instructed, a child must be buckled forward. The child is responsible and must be advised using proper child seat.

*Note:* Always use proper tie-strap technique when tie-strap is used. Tie-strap must be correctly secured to the vehicle's seat belt.

## Power seat

With the ignition on, turn the switch on.

- 1 - Close
- 2 - Open to the comfort position
- 3 - Open all the way
- 4 - Lock open

*Note:* Always check the model when using the seat. Check to see that no one is in the car, or serious personal injury could result.
