Treatment Of Patients In The Borderline Spectrum:

Treatment of Patients in the Borderline Spectrum William W. Meissner, 1988 In this volume Dr William Meissner offers a concrete approach to the therapy of borderline patients For Meissner the term borderline does not refer to one diagnostic entity but rather to a series of entities of varying degrees of pathological organization reflecting a range of structural and functional levels This shift in viewpoint has crucial implications for clinical treatment It calls for a variety of psychotherapeutic strategies and a more flexible more responsive therapeutic schema correlated to the patient's level of pathology

Treatment of Patients in the Borderline Spectrum William W. Meissner (s.j.), 1988 Practice Guideline for the Treatment of Patients with Borderline Personality Disorder American Psychiatric Association. Work Group on Borderline Personality Disorder, 2001 This edition offers an updated synthesis of current scientific knowledge and rational clinical practice for patients with borderline personality disorder The summary of treatment recommendations is keyed according to the level of confidence with which each recommendation is made and coded to show the nature of its supporting evidence

American Psychiatric Association Practice Guidelines for the Treatment of Psychiatric Disorders American Psychiatric Association, 2004 Practice Guidelines provide a comprehensive synthesis of available information relevant to the clinical topic This volume collects in one place eleven of the APA's published Practice Guidelines Includes helpful introductory material and a cumulative index

Giovacchini,1993-02 In this work Giovacchini traces the cultural transition of the borderline disorder from its transformation from the hysterical patients who confronted Freud Breuer and other psychiatrists a hundred years ago He employs the hysterical ancestry of the borderline to sort out some of their important symptomatic characteristics such as dissociation conversion and pain intolerance Giovacchini s focus on the psychosomatic aspects of borderline patients is unique The somatic conversion of the hysterical patient became the hypochondriasis of the borderline patient and he ultimately states that they are due to psychic lacunae or areas of emptiness that are devoid of psychological content thereby predisposing the patient to develop somatic disruptions of mental pain These hypochondriacal preoccupations he states serve as a defense organizer for these patients Giovacchini also deals at great length with the importance of the holding environment and of phenomenological interpretations in contrast to transference interpretations which help to develop the holding environment atmosphere He also deals with the importance of transitional objects and transitional phenomena in the symptomatology and treatment of these patients This work is suitable for mental health workers from the lowest to the highest level of sophistication It is a highly useful textbook manual and guide to the understanding handling and treatment of those disturbing patients who more and more constitute our patient load

The Primacy of Structure Althea J. Horner,1990 In *The Primacy of Structure* Althea Horner argues that effective psychotherapeutic intervention depends on the understanding of clinical symptoms in terms of the patient s underlying character structure For example obsessive behavior that functions to hold together a fragile inadequately integrated self must be distinguished from obsessive behavior that defends against awareness of guilt and anxiety In evaluating patients Dr

Horner asks herself whether he or she was well integrated and well differentiated before the presenting complaint or a borderline individual already at risk. These facts are critical for the patient's therapy. In Part I Dr Horner discusses the development of character in Part II character pathology and in Part III the treatment of character pathology. Mental health professionals will find this a useful guide to psychotherapy of the character problems that lie behind their patients' presenting symptoms.

The Course of Life: Early adulthood Stanley I. Greenspan, George H. Pollock, 1989

Psychoanalytic Clinical Practice Richard D. Chessick, 2000. In this book the author selects and presents eighteen of his most salient clinical papers. His presentation of detailed treatment cases is useful to the therapist and reveals an original orientation based on his five channel theory of psychoanalytic listening that involves listening and responding to the patient from different stances or frameworks. He also reviews the various factors that he feels are operative in bringing about changes in psychoanalytic treatment. Clinical material from the treatment of borderline patient, eating disorders, psychosomatic disorders, schizophrenic disorders, obsessive compulsive disorders and characterological and personality disorders is included. This study is personal and reveals much about the inner thoughts of the psychoanalyst as he struggles to deal with difficult problems including impasses and failures in the treatment.

The Examination of MMPI-2 Profile Similarities and Differences Between Combat-related and Sexual Assault-related Post-traumatic Stress Disorder Joshua Lewis Kirz, 1996

What Is Effective in Psychoanalytic Therapy W. W. Meissner, 1991. This book begins with Strachey's statement of the therapeutic action of psychoanalysis representing the classical psychoanalytical technique that prevailed in the 1930s. Then Meissner takes up the shifts in thinking that have subsequently evolved. Today we hold a more relational concept of the therapeutic action based on a developmentally rooted parent-child model. This places greater emphasis on the vicissitudes of relational involvements than on specific interpretive techniques. Emphasis is given to collaborative efforts between patient and analyst as central to the working of the analytic process. Factors such as empathy, interpretation and positive and negative transference to the therapeutic alliance are explored.

Psychoanalysis and Contemporary Thought, 2000

Personality-guided Therapy for Depression Neil R. Bockian, 2006. Describes a promising new approach to treating individuals with complicated depression for whom progress is painfully slow, elusive or followed by relapse. The causes and experience of depression are influenced by personality style. Depression experienced by a person with a dependent style, for example, differs markedly from that experienced by someone with an antisocial personality. This volume, drawing insights from major theoretical orientations, demonstrates how psychotherapy can be tailored to patients' varying needs and communication styles. Because treating personality disorders alleviates depression and vice versa, this approach offers new hope for progress in both realms. Using Theodore Millon's personality-guided psychology as a framework, author Neil R. Bockian illuminates how taking personality into account enables psychologists to tailor their interventions and thus improve the prospects for long term recovery. For each personality type the author explores how prevalent depression is, what promotes and maintains it.

how psychological biological and social factors contribute to it and the role of medications and of therapist reactions to the patient This groundbreaking book offers practitioners researchers and students a framework for understanding how personality factors increase vulnerability to depression or help buffer against it Jacket PsycINFO Database Record c 2007 APA all rights reserved
