

Trigonometry

Trigonometry comes from the Greek words *trigon* (triangle) and *metron* (measure). It is the study of triangles. Trigonometry is usually studied as the measurements of sides and angles of triangles and as points on a unit circle. The measures of angles are usually represented by letters from the Greek alphabet such as θ , α , β , and γ .

Right Triangles

Definitions & the Pythagorean Theorem

- Right triangle:** Triangle with exactly one 90° (right) angle.
 - Hypotenuse:** Longest side of a right triangle; always located opposite the right angle.
 - Legs:** The two shorter sides of a right triangle.
- EX: Triangle ABC is a right triangle.
AC and BC are legs, and AB is the hypotenuse.

- The **Pythagorean Theorem** states that the sum of the squares of the legs of a right triangle is equal to the square of the hypotenuse.
- Symbolically, this is represented as $a^2 + b^2 = c^2$, where a and b are the lengths of the legs of a right triangle, and c is the length of the hypotenuse.

EX: Solve for r in right triangle RST.

Solution:
Use the Pythagorean Theorem.
 $r^2 + t^2 = c^2$
 $r^2 + (24)^2 = (26)^2$
 $r^2 = 576 - 676$
 $r^2 = 100$
 $r = 10$ cm

Special Right Triangles

- There are two **special right triangles** with properties that are very useful in problems solving. These triangles occur in enough applications that their side length relationships should be memorized.
- A **30° - 60° - 90° triangle** has a 30° angle, a 60° angle, and a right angle. In a 30° - 60° - 90° triangle, the sides are in the ratio $1 : \sqrt{3} : 2$. In other words, if the shorter

- leg has length x , then the longer leg is $x\sqrt{3}$ units long, and the hypotenuse is 2 units long.
- EX: If $x = 15$ ft, then $h = 15\sqrt{3}$ ft, and $c = 30$ ft.

- A **45° - 45° - 90° triangle** has two 45° angles and a right angle. In a 45° - 45° - 90° triangle, the sides are in the ratio $1 : 1 : \sqrt{2}$. If the legs each have length x , then the hypotenuse is $x\sqrt{2}$ units long.
- EX: If $x = 6.4$ mm, then $l = 6.4$ mm, and $m = 6.4\sqrt{2}$ mm.

Trigonometric Ratios

- Ratio of the length of two sides of a right triangle relative to a given angle. These include the sine, cosine, and tangent ratios.
- In right triangle ABC with acute angles A and B, the ratios are defined as follows:
 - Sine ratio:** Ratio of the opposite leg to the hypotenuse.
 - Cosine ratio:** Ratio of the adjacent leg to the hypotenuse.
 - Tangent ratio:** Ratio of the opposite leg to the adjacent leg.

Trigonometric Ratios

Sine ratio	Cosine ratio	Tangent ratio
$\sin A = \frac{a}{c}$	$\cos A = \frac{b}{c}$	$\tan A = \frac{a}{b}$
$\sin B = \frac{b}{c}$	$\cos B = \frac{a}{c}$	$\tan B = \frac{b}{a}$

EX: Find the sine, cosine, and tangent ratios for the acute angles in right triangle RST.

Right Triangle Trigonometry

$$\begin{aligned}\sin B &= \frac{12}{17} & \sin T &= \frac{6}{17} \\ \cos B &= \frac{6}{17} & \cos T &= \frac{12}{17} \\ \tan B &= \frac{12}{6} & \tan T &= \frac{6}{12}\end{aligned}$$

- The **reciprocal trigonometric ratios** are the cosecant, secant, and tangent ratios.

Reciprocal Trigonometric Ratios

Cosecant (Reciprocal of sine)	$\csc \theta = \frac{1}{\sin \theta} = \frac{\text{hypotenuse}}{\text{opposite}}$
Secant (Reciprocal of cosine)	$\sec \theta = \frac{1}{\cos \theta} = \frac{\text{hypotenuse}}{\text{adjacent}}$
Cotangent (Reciprocal of tangent)	$\cot \theta = \frac{1}{\tan \theta} = \frac{\text{adjacent}}{\text{opposite}}$

Trigonometric Functions

- The trigonometric ratios define **trigonometric functions** of an angle measure, θ . For example, the functions $y = \sin(\theta)$, $y = \cos(\theta)$, $y = \tan(\theta)$, $y = \csc(\theta)$, $y = \sec(\theta)$, and $y = \cot(\theta)$, can be used to describe the particular ratio for a given angle measure. You can use a scientific calculator to

$$\begin{aligned}\sin(50^\circ) &= 0.766 \\ \cos(34.5^\circ) &= 0.707 \\ \tan(23.4^\circ) &= 0.435 \\ \csc(60^\circ) &= 1.155 \\ \sec(75^\circ) &= 3.864 \\ \cot(15^\circ) &= 3.732\end{aligned}$$

- estimate the values of trigonometric functions for a given angle measure.
 - Inverse trigonometric functions** take a given ratio and "undo" the corresponding trigonometric function to determine the angle measure. These functions are denoted by the prefix arc or by an exponent of -1 .
 - EX: The three functions $y = \arcsin x = \sin^{-1} x$, $y = \arccos x = \cos^{-1} x$, and $y = \arctan x = \tan^{-1} x$ represent the inverses of the sine, cosine, and tangent functions, respectively.
- NOTE: The -1 exponent used in the notation $y = \sin^{-1} x$ indicates the inverse sine function, not the reciprocal of the sine function. Thus, $\sin^{-1} x$ is (sine)⁻¹. Be careful to recognize the correct notation when solving problems involving inverse trigonometric functions.

Solving for Unknown Sides & Angles

- Trigonometric ratios and inverse trigonometric functions can be used to find unknown side lengths and angle measures in right triangles.
- EX: Find $m\angle A$ and $m\angle C$ in the figure. Round to the nearest tenth of a degree.

Trigonometry Study Guides Introduction

In the digital age, access to information has become easier than ever before. The ability to download Trigonometry Study Guides has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Trigonometry Study Guides has opened up a world of possibilities. Downloading Trigonometry Study Guides provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Trigonometry Study Guides has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Trigonometry Study Guides. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Trigonometry Study Guides. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Trigonometry Study Guides, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Trigonometry Study Guides has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous

learning and intellectual growth.

FAQs About Trigonometry Study Guides Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Trigonometry Study Guides is one of the best book in our library for free trial. We provide copy of Trigonometry Study Guides in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Trigonometry Study Guides. Where to download Trigonometry Study Guides online for free? Are you looking for Trigonometry Study Guides PDF? This is definitely going to save you time and cash in something you should think about.
