Office of Education, 1954 **School Science and Mathematics**, 1929 *Miss Southeast* Elizabeth Lindsey Rogers, 2024-09-15 A collection of narrative essays on femininity sexuality community and belonging Miss Southeast explores the strange often contradictory cultural circumstances of being queer and female in the American South and beyond Born and raised in North Carolina the youngest in a family of precocious daughters Rogers spends her teenage years as a half closeted lesbian desperate to escape the South convinced the rest of the United States must be more enlightened than our cow dotted corner of the county Adulthood takes Rogers to Ohio New York Louisiana Arkansas Washington DC and China but each essay finds her reckoning with participation in and resistance to rigid cultural institutions whether a coming out story set at a high school beauty pageant or a meditation on swimming pools as emblems of racial divides across the South In lyric prose enlivened by a poet's sense of musicality Miss Southeast considers how both place and our layered identities shape our sense of belonging **Teaching Materials for Mathematics Classes** Kenneth E. Brown, 1953 *Pedagogy in a New Tonality* Peter Gouzouasis, 2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook *Beyond Monet The Artful Science of Instructional Intelligence* However through their journeys of becoming teacher learner researchers many discovered numerous creative

variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning. Thus, this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century.

Algebra and Trigonometry Cynthia Y. Young, 2021-08-31 Cynthia Young's *Algebra and Trigonometry Fifth Edition* allows students to take the guesswork out of studying by providing them with an easy-to-read and clear roadmap: what to do, how to do it, and whether they did it right. With this revision, Cynthia Young revised the text with a focus on the most difficult topics in Trigonometry, with a goal to bring more clarity to those learning objectives. *Algebra and Trigonometry Fifth Edition* is written in a voice that speaks to students and mirrors how instructors communicate in lecture. Young's hallmark pedagogy enables students to become independent, successful learners. Key features like Parallel Words and Math and Catch the Mistake exercises are taken directly from classroom experience and keep the learning fresh and motivating.
