Green Composites for Automotive Applications Georgios Koronis, Arlindo Silva, 2018-11-10 Green Composites for Automotive Applications presents cutting edge comprehensive reviews on the industrial applications of green composites The book provides an elaborative assessment of both academic and industrial research on eco design durability issues

environmental performance and future trends Particular emphasis is placed on the processing and characterization of green composites specific types of materials such as thermoset and thermoplastic nanocomposites sandwich and polymer biofoams Additional sections cover lifecycle and risk analysis As such this book is an essential reference resource for R D specialists working in materials science automotive chemical and environmental engineering as well as R D managers in industry Contains contributions from leading experts in the field Covers experimental analytical and numerical analysis Deals with most important automotive aspects Provides a special section dedicated to lifecycle assessment

Recycled Plastic Biocomposites Md Rezaur Rahman, Muhammad Khusairy Bin Bakri, 2022-01-24 Recycled plastic biocomposites have attracted widespread attention from both researchers and manufacturers due to the significant improvements in their physico mechanical thermal rheological and barrier properties when compared to conventional materials as well as their potential regarding commercialization and zero waste Recycled Plastic Biocomposites presents the latest information on recycled polymers textiles pulp and paper wood plastic rubber waste plastic and micro and nano effects of recycled plastic waste resources that have great potential as reinforcement materials in composites because they are non toxic inexpensive biodegradable cost effective and available in large amounts Recycled plastic biocomposites are now starting to be deployed in a broad range of materials applications due to their advantages over petroleum based materials Currently there are no limits to the possibility of their applications They also have exceptional sustainable and biodegradable properties when compared to conventional materials such as polymers and composites Recycled Plastic Biocomposites reviews the latest research advances on recycled plastic based biocomposites including thermoplastic thermoset rubber and foams In addition the book covers critical assessments on the economics of recycled plastic including a cost performance analysis that discusses its strengths and weaknesses as a reinforcement material The huge potential applications of recycled plastic in industry are also explored in detail with respect to low cost recyclable and biodegradable properties and the way they can be applied to the automotive construction and packaging industries The life cycles of both single and hybrid recycled plastic based polymer composites and biocomposites are also discussed in detail From the viewpoint of recycled plastic based polymer composites the book covers not only the well known role of recycled polymers and composites but also advanced materials produced from micro nano and pico scale fillers that achieve better physical mechanical morphological and thermal properties This book will be an essential reference resource for academic and industrial researchers materials scientists and those working in polymer science and engineering chemical engineering manufacturing and biocomposites Places an emphasis on micro nano and pico scale fillers that significantly improve properties Discusses the most suitable fabrication methods properties and applications Features critical assessments on the economics of recycled plastic including a cost performance analysis that reviews its strengths and weaknesses as a reinforcement material

Biocomposite and Synthetic Composites for Automotive Applications S.M. Sapuan, R.A. Ilyas, 2020-11-24 Biocomposite and Synthetic Composites for

Automotive Applications provides a detailed review of advanced macro and nanocomposite materials and structures and discusses their use in the transport industry specifically for automotive applications This book covers materials selection properties and performance design solutions and manufacturing techniques A broad range of different material classes are reviewed with emphasis on advanced materials and new research pathways where composites can be derived from agricultural waste in the future as well as the development and performance of hybrid composites The book is an essential reference resource for those researching materials development and industrial design engineers who need a detailed understanding of materials usage in transport structures Life Cycle Assessment LCA analysis of composite products in automotive applications is also discussed and the effect of different fiber orientation on crash performance Synthetic natural fiber composites for aircraft engine fire designated zones are linked to automotive applications Additional chapters include the application and use of magnesium composites compared to biocomposites in the automotive industry autonomous inspection and repair of aircraft composite structures via vortex robot technology and its application in automotive applications composites in a three wheeler tuk tuk and thermal properties of composites in automotive applications Covers advanced macro and nanocomposites used in automotive structures Emphasizes materials selection properties and performance design solutions and manufacturing techniques Features case studies of successful applications of biocomposites in automotive structures Vinyl Ester-Based Biocomposites Senthil Muthu Kumar Thiagamani, Chandrasekar Muthukumar, Senthilkumar Krishnasamy, Suchart Siengchin, 2023-09-29 Vinyl Ester Based Biocomposites provides a comprehensive review of the recent developments characterization and applications of natural fiber reinforced vinyl ester biocomposites It also addresses the importance of natural fiber reinforcement on the mechanical thermal and interfacial properties The book explores the widespread applications of natural fibre reinforced vinyl ester composites ranging from the aerospace sector automotive parts construction and building materials sports equipment to household appliances Investigating the moisture absorption and ageing on the physio chemical mechanical and thermal properties of the vinyl ester based composites this book also considers the influence of hybridization fibre architecture and fiber ply orientation The book serves as a useful reference for researchers graduate students and engineers in the field of polymer composites
