

USER'S MANUAL

1.0 GENERAL INFORMATION

General Information section explains in general terms the system and the purpose for which it is intended.

1.1 System Overview

ArboWebForest is application, which allows collecting information about forest plots. The application provides electronic version of form used in collecting plot information. The application saves data collected to database. Its operational status is under development. ArboWebForest operates on mobile devices with Android operating system.

1.2 Organization of the Manual

The user's manual consists of five sections: General Information, System Summary, Getting Started, Using The System, and Reporting.

General Information section explains in general terms the system and the purpose for which it is intended.

System Summary section provides a general overview of the system. The summary outlines the uses of the system's hardware and software requirements, system's configuration, user access levels and system's behavior in case of any contingencies.

Getting Started section explains how to get ArboWebForest and install it on the device. The section presents briefly system menu.

Using The System section provides a detailed description of system functions.

Reporting section describes in what way information collected by the application are presented and how to access the information.

User Manual Standards

M Walker

User Manual Standards:

The Highway Design and Maintenance Standards Model: User's manual for the HDM-III model Thawat Watanatada, World Bank, 1987 This book describes the Highway Design and Maintenance Standards model HDM III and its constituent components and provides a comprehensive discussion of the submodels their interaction and the operational parameters involved The HDM III is designed to make comparative cost estimates and economic evaluations of different construction and maintenance options including different time staging strategies either for a given road project on a specific alignment or for groups of links on an entire network The user can search for the alternative with the lowest discounted total cost and can call for rates of return net present values or first year benefits If the HDM is used in conjunction with the Expenditure Budgeting Model the set of design and maintenance options that would minimize total discounted transport costs or maximize net present value of an entire highway system under year to year budget constraints can be determined The HDM III model is not only a readily usable program for handling voluminous computations automatically it is also a repository of the most extensive and consistent set of empirical data on the subject The information includes the qualitative structure and quantitative parameters of relationships among construction standards maintenance traffic characteristics road deterioration and vehicle operating costs
