Intelligence Shahnaz Bahman, Helen Maffini, 2008-07-25 Today's world presents children with a wide range of challenges that can hinder their personal and academic development. It is essential therefore that as educators we equip children with the knowledge and skills they need to be successful not just academically but also in life. Although there is a real pressure for schools to meet academic standards, it is possible for practitioners to stimulate emotional growth through everyday classroom activities. By carefully planning a curriculum that encourages children to explore their feelings through imaginative media and make-believe play, healthy emotional growth can occur. The authors of this timely book provide a wealth of practical tools and techniques that you can use with your children to successfully develop their emotional intelligence. *Cases on Models and Methods for STEAM Education* Bazler, Judith Ann, Van Sickle, Meta Lee, 2019-09-27 STEAM education can be described in two ways. One model emphasizes the arts and is not as concerned about the accuracy of the STEM fields. In the second model, STEM content is the prevailing force with a focus on accuracy and the arts are used in limited and secondary resources for the teaching of the content. However, in order to promote creative thinking, allow for higher student engagement, and offer a more well-rounded education, a STEAM model where science, technology, engineering, arts, and mathematics are equal contributors to the process of learning is needed. *Cases on Models and Methods for STEAM Education* is an important scholarly resource that provides inclusive models and case studies highlighting best techniques and practices for implementing STEAM models in teaching and assists teachers as they learn to use such methods through the inclusion of practical activities for use in the classroom. Highlighting a wide range of topics such as science education, fine arts, and teaching models, this book is essential for educators, administrators, curriculum developers, instructional designers, policymakers, academicians, researchers, and students.
