Using Massive Digital Libraries A Lita Guide Lita Guides:

Using Massive Digital Libraries Andrew Weiss, LITA, 2014-07-18 Some have viewed the ascendance of the digital library as some kind of existential apocalypse nothing less than the beginning of the end for the traditional library But Weiss recognizing the concept of the library as a big idea that has been implemented in many ways over thousands of years is not so gloomy In this thought provoking and unabashedly optimistic book he explores how massive digital libraries are already adapting to society's needs and looks ahead to the massive digital libraries of tomorrow covering The author's criteria for defining massive digital libraries A history of Google Books and the Very Large Digital Library with a refresher on the initial protests of the scholarly communication community Practices of massive digital libraries and how traditional libraries are evolving to integrate their presence A comparison of the collection development approaches of Google Books and HathiTrust Library applications such as MDL for research in digital humanities catalog integration through the Google Book API Culturenomics and the Google Ngram viewer Case studies of library projects with Google Books with analysis of aspects such as legibility of scans metadata accuracy culture and diversity Providing a solid grounding on the concept of massive digital libraries and their strengths and weaknesses as digital information tools this book will help librarians understand how they function and what we can expect in the future

The Organization of Information Daniel N. Joudrey, Arlene G. Taylor, 2017-11-27 This fourth edition provides an updated look at information organization featuring coverage of the Semantic Web linked data and EAC CPF new metadata models such as IFLA LRM and RiC and new perspectives on RDA and its implementation This latest edition of The Organization of Information is a key resource for anyone in the beginning stages of their LIS career as well as longstanding professionals and paraprofessionals seeking accurate clear and up to date guidance on information organization activities across the discipline The book begins with a historical look at information organization methods covering libraries archives museums and online settings It then addresses the types of retrieval tools used throughout the discipline catalogs finding aids indexes bibliographies and search engines before describing the functionality of systems explaining the basic principles of system design and defining how they affect information organization The principles and functionality of metadata is next with coverage of the types functions tools and models particularly FRBR IFLA LRM RDF and how encoding works for use and sharing for example MARC XML schemas and linked data approaches The latter portion of the resource describes specific activities related to the creation of metadata for resources These chapters offer an overview of the major issues challenges and standards used in the information professions addressing topics such as resource description including standards found in RDA DACS and CCO access points authority control subject analysis controlled vocabularies notably LCSH MeSH Sears and AAT and categorization systems such as DDC and LCC

Technology Disaster Response and Recovery Planning: A LITA Guide Mary Mallery, 2015-04-08 Most library disaster plans focus on response and recovery from collection and facilities disasters such as fire and floods But

because technology is becoming ever more integral to libraries role in their communities any interruption in service and resources is a serious matter A disaster s effect on internet and social media sites electronic resources digital collections and staff and public infrastructure of PCs tablets laptops and other peripherals requires special consideration Featuring contributions from librarians who offer hard won advice gained from personal experience this compendium leads readers through a step by step process of creating a library technology disaster response and recovery plan This LITA guide Outlines the three phases of technology disaster response with examples of planning and implementation strategies from several different libraries Describes how to conduct an inventory and risk assessment Provides detailed case studies of recent large scale technology disasters in libraries and documents how lessons learned have helped to improve technology disaster planning Offers an in depth look at future trends in cloud computing mapping out the new field of disaster mitigation response and recovery planning Includes useful resources such as checklists templates and a sample communications plan Though libraries can never know when or how disaster may strike with the help of this guide they ll be able to craft a response and recovery plan to weather the storm and get library technology back online as quickly as possible
