Multilevel Analysis of the PISA Data Esther Sui Chu Ho, 2013-12-15 Multilevel analysis can help to get deeper insights into factors that may have impact on schooling outcomes assessed in PISA In this book multilevel analysis is applied by linking student performance to the structure and processes of both the family and the school the two major social contexts that exert powerful influence on young people Essential important policy issues including parental involvement school decentralization and medium of instruction are examined and the possible relationship between these policies and student's achievement in light of the evidence collected in the first three cycles of the PISA study is explored

Besides appreciating how researchers have used multilevel analysis in a variety of ways would be an effective path to learn it. The analysis in this book will add significantly to the storehouse of knowledge about the application of multilevel analysis in assessing the quality and equality of education in East Asian societies. The findings thereof would also serve as useful references for researchers, policymakers, school administrators, and teachers.

Research Methods for Public Administrators Gary Rassel, Suzanne Leland, Zachary Mohr, Elizabethann O'Sullivan, 2020-12-29. Research Methods for Public Administrators contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic statistics to more advanced techniques. The basics of conducting experiments, survey research, case studies, and focus groups are discussed. Data organization, management, and analysis are also covered, as are data analysis and hypothesis testing. Descriptive and inferential statistics are discussed and illustrated with examples. The book also includes a chapter on obtaining and analyzing secondary data already collected for other purposes and a chapter on reporting and presenting research results to a variety of audiences. This is a general textbook written primarily for students of public administration and practitioners in public and not-for-profit organizations. It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies. The material is discussed at a level to be accessible and with enough detail to be useful. New to the seventh edition: Additional and expanded material on qualitative research, big data, metadata, literature reviews, and causal inference. New material on experiments and experimental research. New examples and case studies including those dealing with public policy. Expanded material on using computers for data management. Information on new NSF and NIH ethics and protection of human subjects requirements for researchers. New data sets and Power Point slides for each chapter.

Statistical Methods in Neuropsychology David Aaron Maroof, 2012-06-12. This book describes appropriate statistical models that are commonly utilized in neuropsychology. The book discusses such issues as developing normative data for neuropsychological measures, assessing the validity of neuropsychological tests, and quantifying change over time through longitudinal analyses. The rationale for and allure of the volume is the fact that there are no publications that dovetail the two subdisciplines of applied statistics and neuropsychology. The overall objective of this book is to provide a pragmatic and concrete source for applying methodological and statistical techniques in research studies whose emphasis includes neuropsychology. Since there are a plethora of techniques to arrive at similar answers, each method with its strengths and weaknesses will be delineated. The beauty of the book will be that it will hopefully demystify commonly encountered issues faced with researchers. More specifically, it will provide a how-to-do-it approach.

Basic Statistics Olive Jean Dunn, Virginia A. Clark, 2009-08-11. New Edition of a Classic

Guide to Statistical Applications in the Biomedical Sciences In the last decade there have been significant changes in the way statistics is incorporated into biostatistical medical and public health research Addressing the need for a modernized treatment of these statistical applications Basic Statistics Fourth Edition presents relevant up to date coverage of research methodology using careful explanations of basic statistics and how they are used to address practical problems that arise in the medical and public health settings Through concise and easy to follow presentations readers will learn to interpret and examine data by applying common statistical tools such as sampling random assignment and survival analysis Continuing the tradition of its predecessor this new edition outlines a thorough discussion of different kinds of studies and guides readers through the important related decision making processes such as determining what information is needed and planning the collections process The book equips readers with the knowledge to carry out these practices by explaining the various types of studies that are commonly conducted in the fields of medical and public health and how the level of evidence varies depending on the area of research Data screening and data entry into statistical programs is explained and accompanied by illustrations of statistical analyses and graphs Additional features of the Fourth Edition include A new chapter on data collection that outlines the initial steps in planning biomedical and public health studies A new chapter on nonparametric statistics that includes a discussion and application of the Sign test the Wilcoxon Signed Rank test and the Wilcoxon Rank Sum test and its relationship to the Mann Whitney U test An updated introduction to survival analysis that includes the Kaplan Meier method for graphing the survival function and a brief introduction to tests for comparing survival functions Incorporation of modern statistical software such as SAS Stata SPSS and Minitab into the presented discussion of data analysis Updated references at the end of each chapter Basic Statistics Fourth Edition is an ideal book for courses on biostatistics medicine and public health at the upper undergraduate and graduate levels It is also appropriate as a reference for researchers and practitioners who would like to refresh their fundamental understanding of statistical techniques

Repeated Measures Design for Empirical Researchers J. P. Verma, 2015-08-21 Introduces the applications of repeated measures design processes with the popular IBM SPSS software Repeated Measures Design for Empirical Researchers presents comprehensive coverage of the formation of research questions and the analysis of repeated measures using IBM SPSS and also includes the solutions necessary for understanding situations where the designs can be used In addition to explaining the computation involved in each design the book presents a unique discussion on how to conceptualize research problems as well as identify appropriate repeated measures designs for research purposes Featuring practical examples from a multitude of domains including psychology the social sciences management and sports science the book helps readers better understand the associated theories and methodologies of repeated measures design processes The book covers various fundamental concepts involved in the design of experiments basic statistical designs computational details differentiating independent and repeated measures designs and testing assumptions Along with an introduction to

IBM SPSS software Repeated Measures Design for Empirical Researchers includes A discussion of the popular repeated measures designs frequently used by researchers such as one way repeated measures ANOVA two way repeated measures design two way mixed design and mixed design with two way MANOVA Coverage of sample size determination for the successful implementation of designing and analyzing a repeated measures study A step by step guide to analyzing the data obtained with real world examples throughout to illustrate the underlying advantages and assumptions A companion website with supplementary IBM SPSS data sets and programming solutions as well as additional case studies Repeated Measures Design for Empirical Researchers is a useful textbook for graduate and PhD level students majoring in biostatistics the social sciences psychology medicine management sports physical education and health The book is also an excellent reference for professionals interested in experimental designs and statistical sciences as well as statistical consultants and practitioners from other fields including biological medical agricultural and horticultural sciences J P Verma PhD is Professor of Statistics and Director of the Center for Advanced Studies at Lakshmibai National Institute of Physical Education India Professor Verma is an active researcher in sports modeling and data analysis and has conducted many workshops on research methodology research designs multivariate analysis statistical modeling and data analysis for students of management physical education social science and economics He is the author of Statistics for Exercise Science and Health with Microsoft Office Excel also published by Wiley

Child and Adolescent Online Risk Exposure Michelle F. Wright, Lawrence B. Schiamberg, 2020-11-19 Child and Adolescent Online Risk Exposure An Ecological Perspective focuses on online risks and outcomes for children and adolescents using an ecological perspective i e the intersection of individuals in relevant contexts for a better understanding of risks associated with the youth online experience The book examines the specific consequences of online risks for youth and demonstrates how to develop effective and sensitive interventions and policies Sections discuss why online risks are important individual and contextual factors different types of risk online risks among special populations such as LGBT youth physically or intellectually disabled youth and ethnic and religious minorities and intervention efforts Examines online risks such as problematic internet use contact risk behaviors online exploitation online hate cyberbullying and cyberstalking Explores the concept of digital citizenship Includes theoretical considerations and the prevalence of online risks Covers policy and intervention recommendations for reducing online risks
