Waddenland En Waddenzee:

Waddenland Outstanding Linde Egberts, Meindert Schroor, 2025-10-01 The Wadden Sea Region is comprised of the embanked coastal marshes and islands in the Wadden Sea near Denmark Germany and the Netherlands This area retains an exceptional common history in all its aspects archaeologically economically socially and culturally Its settlement history of more than two thousand years is unrivalled and still mirrored in the landscape Even though it has never constituted a political unity it still shares a landscape and cultural heritage For example the approaches to water management and associated societal organization developed in the region during the last millennium have set significant world standards This book offers an overview of current research on history landscape and cultural heritage of the Wadden Sea region

Waddenland Outstanding Linde Egberts, Meindert Schroor, 2018 The Wadden Sea Region is comprised of the embanked coastal marshes and islands in the Wadden Sea near Denmark Germany and the Netherlands This area retains an exceptional common history in all its aspects archaeologically economically socially and culturally Its settlement history of more than two thousand years is unrivalled and still mirrored in the landscape Even though it has never constituted a political unity it still shares a landscape and cultural heritage For example the approaches to water management and associated societal organization developed in the region during the last millennium have set significant world standards This book offers an overview of current research on history landscape and cultural heritage of the Wadden Sea region [Assembling the Archipelago: Heritage in Energy Transitions and Climate Action](#) Marilena Mela, 2025-09-09 This book explores the potential of heritage to enact sustainable human environment relationships across geographical differences It does so by travelling to four archipelagoes the Wadden Islands in the Netherlands the Cyclades in Greece Shetland in Scotland and the Aeolian Islands in Italy In the face of planetary socioenvironmental crises the reliance on sustainable development strategies including the energy transition on technocratic top down solutions fail to counterbalance global agendas of extraction and growth and address environmental injustices in peripheral places This book stresses the need to think small arguing that seeds for meaningful change exist in such places and the geographically and historically situated relationships between people and environments Islands interconnected yet autonomous places with unique histories are good places to start In four archipelagoes frictions produced both by climate change and climate mitigation the fragile consensus around a solar park in the Wadden Sea conflicts around wind turbine towers in the Aegean experiments with the tides in Shetland and volcanic episodes in the Aeolian come in dialogue with the learning potential of their environmental and cultural heritage The counterposing of these stories renegotiates established discourses of heritage and sustainability and the associated courses of action in policy and planning This contribution will resonate with academics students policymakers and activists in heritage studies environmental humanities landscape studies science and technology studies and sustainability Readers are invited to participate in the life and troubles of four island landscapes and to think along on emergent archipelagic claims

towards sustainable and just futures **Library of Congress Catalogs** Library of Congress,1976 **National Union Catalog** ,1978 Includes entries for maps and atlases Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library. Research Libraries,1979 **Maritime Spaces and Society** ,2022-06-08

Maritime spaces are socially constructed by humans and refer to seas and islands coasts port cities and villages as well as ships and other human made marine structures Social interaction with marine environments and living beings e g in a symbolic cultural or economic manner has led to the emergence of spatial structures which affect the knowledge beliefs meanings and obstinately patterns Those structures shape mutual expectations of human beings and form the perception imagination or memory of inhabitants of maritime spaces They enable or restrict human action construct people s everyday life their norms and values and are changeable Contributors include Jan Asmussen Robert Bart omiejski Benjamin Bowles Isabel Duarte Eduardo Sarmiento Ferreira Rita Gr cio Marie C Grasmeier Karolina Izdebska Seung Kuk Kim Arkadiusz Ko odziej Agnieszka Ko odziej Durna Maciej Kowalewski Urszula Koz owska Ulrike Kronfeld Goharani Rute Muchacho Giacomo Orsini W odzimierz Karol Pessel C lia Quico Harini Sivalingam Joana Sousa Frank Sowa Nuno Cintra Torres and G nter Warsewa *Carbon dioxide removal: Perspectives from the social sciences and humanities* Anders Hansson,Mathias Fridahl,Miranda Boettcher,Shinichiro Asayama,2024-07-09 Carbon dioxide removal CDR approaches are becoming increasingly central to visions of decarbonizing national economies The past few years have seen an increasing number of countries committed to net zero targets preceded by a surge of modelled 1.5 °C scenarios envisioning large scale future CDR deployment The prospect of CDR deployment raises new complex socio ecological challenges and presents new deep uncertainties These complexities challenges and uncertainties cannot be investigated using solely the techno economic modelling and environmental risk assessment methods that currently dominate the construction of policy relevant knowledge on CDR Social sciences and the humanities perspectives on CDR are often restricted to instrumental tasks such as investigating public acceptance overcoming social resistance or supporting the development of integrated assessment models There is a need for more diverse investigations of CDR which include not only environmental and techno economic dimensions but also explore key societal complexities challenges and uncertainties Against this backdrop we call for submissions on CDR stemming from perspectives within the social sciences and humanities We encourage novel empirical and theoretical contributions on CDR related policy design or analyses of recent policy developments at sub national national and international levels of governance e g in context of climate targets and strategies climate tipping points mitigation deterrence or societal transformations **Language as an Ecological Phenomenon** Sune Vork Steffensen,Stephen Cowley,Martin Döring,2024-05-30 Moving beyond a more traditional view of language as a discrete sociocultural and cognitive entity that distorts our understanding of surrounding ecologies this book argues that the starting point for ecolinguistics is an appreciation of language as not just about nature but of nature Exploring this conceptual change in the

field the book presents a process view in which language is substituted by languaging emphasising the bioecologies that we cohabit with numerous other species It puts forward this perspective by looking at the theoretical considerations behind the understanding of languaging as bioecological and through examining languaging in various contexts and places Drawing on examples from across the world it addresses topics such as climate catastrophes corporate narratives questions of ecological leadership the bioecological implications of the COVID pandemic and relational landscapes It also makes use of data from across multiple bioecological settings including the dairy and agricultural industries *New Global Perspectives on Archaeological Prospection* James Bonsall, 2019-09-02 This volume presents over 90 papers from the 13th International Conference on Archaeological Prospection 2019 Sligo Papers address archaeological prospection techniques methodologies and case studies from 33 countries across Africa Asia Australasia Europe and North America reflecting current and global trends in archaeological prospection
