CC: Well infant 4-month checkup.

HPI: This is Jackie a 4-month-old girl. Jackie presents to the office today with her mother, Pam. She states she is here for her daughter's 4-month checkup, and she is doing well overall, but mother is concerned about diaper rash when using 'Pampers' diapers, specifically. Mother states the rash is contained within the diaper area, and just gets worse when her diaper is on for extended time. Mother states she is using Desitin A/D cream and Pittsburgh butt-paste, she uses both interchangeably, and they both work well to control the rash. They have tried Luvs, and Huggies both types of diapers seem to not irritate the diaper area like the Pampers do. Otherwise, there are no other health concerns for Jackie at this visit.
