Technical Data | Clarifier with self-cleaning bowl

This centrifuge has been designed for the clarification of beverages. With the patented Westfalia Separator® hydrostop bowl ejection system, this machine is suitable particularly for applications where the prime target is high yield. High solid contents likewise present no problem. The feed and discharge are in a closed system. The hydrothermotic feed ensures gentle treatment of the product. The centrifugal pump in the discharge generates

adequate pressure to convey the product, for example, into the storage tank. The feed and discharge are rated to suit the respective application.

The bowl is driven via the so-called "short spindle drive" which reliably ensures low-vibration running. The machine is driven by a 3-phase AC motor via a low-maintenance flat belt. Frequency converters are used to optimize the power consumption and avoid current peaks.

All product-contacting parts are made of stainless steel; the gaskets conform to the requirements of food operations. The separator has been designed in accordance with the "hygienic design" guidelines.
