What is Life? Erwin Schrödinger, 2012-03-26 What Is Life is Nobel laureate Erwin Schrödinger's exploration of the question which lies at the heart of biology His essay Mind and Matter investigates what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions Autobiographical Sketches offers a fascinating fragmentary account of his life as a background to his scientific writings

The Secret War Between Downloading and Uploading Peter Lunenfeld, 2011 As we hurtle into the twenty first century will we be passive downloaders of content or active uploaders of meaning The computer writes Peter Lunenfeld is the twenty first century's culture machine It is a dream device serving as the mode of production the means of distribution and the site of reception We haven't quite achieved the flying cars and robot butlers of futurist fantasies but we do have a machine that can function as a typewriter and a printing press a paintbrush and a gallery a piano and a radio the mail as well as the mail carrier But warns Lunenfeld we should temper our celebration with caution we are engaged in a secret war between downloading and uploading between passive consumption and active creation and the outcome will shape our collective futures In *The Secret War Between Downloading and Uploading* Lunenfeld makes his case for using digital technologies to shift us from a consumption to a production model He describes television as the the high fructose corn syrup of the imagination and worries that it can cause cultural diabetes prescribes mindful downloading meaningful uploading and info triage as cures and offers tips for crafting bespoke futures in what he terms the era of Web 2.0 interconnectivity to the nth power He also offers a stand alone genealogy of digital visionaries distilling a history of the culture machine that runs from the Patriarchs Vannevar Bush's WWII generation to the Hustlers Bill Gates and Steve Jobs to the Searchers Larry Page and Sergey Brin of Google fame After half a century of television conditioned consumption downloading Lunenfeld tells us we now find ourselves with a vast new infrastructure for uploading We simply need to find the will to make the best of it

Einstein's Dice and Schrödinger's Cat Paul Halpern, 2015-04-14 When the fuzzy indeterminacy of quantum mechanics overthrew the orderly world of Isaac Newton Albert Einstein and Erwin Schrödinger were at the forefront of the revolution Neither man was ever satisfied with the standard interpretation of quantum mechanics however and both rebelled against what they considered the most preposterous aspect of quantum mechanics its randomness Einstein famously quipped that God does not play dice with the universe and Schrödinger constructed his famous fable of a cat that was neither alive nor dead not to explain quantum mechanics but to highlight the apparent absurdity of a theory gone wrong But these two giants did more than just criticize they fought back seeking a Theory of Everything that would make the universe seem sensible again In *Einstein's Dice and Schrödinger's Cat* physicist Paul Halpern tells the little known story of how Einstein and Schrödinger searched first as collaborators and then as competitors for a theory that transcended quantum weirdness This story of their quest which ultimately failed provides readers with new insights into the history of physics and the lives and work of two scientists whose

obsessions drove its progress Today much of modern physics remains focused on the search for a Theory of Everything As Halpern explains the recent discovery of the Higgs Boson makes the Standard Model the closest thing we have to a unified theory nearly complete And while Einstein and Schrödinger failed in their attempt to explain everything in the cosmos through pure geometry the development of string theory has in its own quantum way brought this idea back into vogue As in so many things even when they were wrong Einstein and Schrödinger couldn't help but get a great deal right

Understanding Space, Time and Causality B.V. Sreekantan, Sisir Roy, 2019-12-06 This book examines issues related to the concepts of space time and causality in the context of modern physics and ancient Indian traditions It looks at the similarity and convergence of these concepts of modern physics with those discussed in ancient Indian wisdom The volume brings the methodologies of empiricism and introspection together to highlight the synergy between these two strands It discusses wide ranging themes including the quantum vacuum as ultimate reality quantum entanglement and metaphysics of relations identity and individuality and dark energy and anti matter as discussed in physics and in Indian philosophical schools like Vedanta Yoga Buddhist Kashmiri Shaivism and Jaina Philosophy First of its kind this book will be an essential read for scholars and researches of philosophy Indian philosophy philosophy of science theoretical physics and social science

Schrödinger Walter J. Moore, Walter John Moore, 1992-05-29 Erwin Schrödinger was a brilliant and charming Austrian a great scientist and a man with a passionate interest in people and ideas In this the first comprehensive biography of Schrödinger Walter Moore draws upon recollections of Schrödinger's friends family and colleagues and on contemporary records letters and diaries Schrödinger's life is portrayed against the backdrop of Europe at a time of change and unrest His best known scientific work was the discovery of wave mechanics for which he was awarded the Nobel prize in 1933 However Erwin was also an enthusiastic explorer of the ideas of Hindu mysticism and in the mountains of his beloved Tyrol he sought a philosophic unity of Mind and Nature Although not Jewish he left his prestigious position at Berlin University as soon as the Nazis seized power After a short time in Oxford he moved to Graz but barely escaped from Austria after the Anschluss He then helped Eamon de Valera establish an Institute for Advanced Studies in Dublin It was here that he spent the happiest years of his life and also where he wrote his most famous and influential book What is Life which attracted some of the brightest minds of his generation into molecular biology Schrödinger enjoyed a close friendship with Einstein and the two maintained a prolific correspondence all their lives Schrödinger led a very intense life both in his scientific research and in his personal life Walter Moore has written a highly readable biography of this fascinating and complex man which will appeal not only to scientists but to anyone interested in the history of our times and in the life and thought of one of the great men of twentieth century science

What Is Life? Erwin Schrodinger, 2014-04-07 Nobel laureate Erwin Schrodinger's What is Life is one of the great science classics of the twentieth century A distinguished physicist's exploration of the question which lies at the heart of biology it was written for

the layman but proved one of the spurs to the birth of molecular biology and the subsequent discovery of the structure of DNA The philosopher Karl Popper hailed it as a beautiful and important book by a great man to whom I owe a personal debt for many exciting discussions It appears here together with Mind and Matter his essay investigating a relationship which has eluded and puzzled philosophers since the earliest times Schrodinger asks what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions Brought together with these two classics are Schrodinger s autobiographical sketches published and translated here for the first time They offer a fascinating fragmentary account of his life as a background to his scientific writings making this volume a valuable addition to the shelves of scientist and layman alike

Public Value and Social Development Bing Wang,2022-03-26 This book aims to seek for the truth which connects public value and social development as basis to build a harmony community for individuals as well as society The book tries to bridge science technology economics politics history ethics and environment under the concept of public values and reveals the essentials of public policy for individual and social development The potential audience of the book are officials and policy makers in the public sectors as well as managers in the private sectors
