Waiting Through Winter:

Women in Waiting in the Westward Movement Linda S. Peavy, 1994 Looks at the lives of the homebound wives of Western pioneers

In Winter's Eye Wallace Collins, 2001-03-07 My endeavor here is to validate and document In Winters Eye what causes me to reflect and try to recapture in retrospect my experiences events propelled then by my pervasive apprehension of frost This symbolic cold weather chills me to the bone In Winters Eye which has now resurfaced in this brooding but stark and detail reality Yet though the metaphorical winter weather doesnt bother me that much anymore but when I accidentally get onto that slippery patch of racial black ice that camouflages the asphalt Thruway as passable then it would hit on my wheels and send me careening into a chaotic irrational verbal spin My meeting with that icy patch on lifes roadway to somewhere or nowhere for that matter freewheels my sense of direction as it throws me off my intended course of normal human progress after which I would struggle to maintain control of myself and the vehicle of my life I am driving down the road if not to somewhere in the future but to obliterate the past where my wheels would swerve and skid helter skelter luckily into the shoulder of the Thruway for my ultimate survival It became a necessity for me then after meeting head on the pronounced differences intoned by the assonant and dissonant sounds that racial preference plays out with acrimony compared with the personal autonomy of my parent culture and the restrictions based on race in another's My endeavor to be accepted by my peers saw me struggle to adapt and to assimilate the new culture I enter of which I wrote about In Winters Eye or simply to remain not just as an entity but preferably that of a functional individual as in the following It is in such an ethnic arena that one jazz dance to the subtle tempo from the racial nuances afoot as one tries to keep time to that unique racial beat sufficient to make one assess ones common experiences with others keeping in mind meanwhile how it was in the countries I lived and traveled over the years In the fall of 1967 it was not a dream I had awakened from and found myself living a life akin to that of a spectator perched on a ledge in the balcony gawking at the happenings taking place below in the arena My consciousness held sway as I ogled at the vibrant milieu of racial politics happening then in my New York I was not dreaming either when I found myself living in an apartment in Corona Queens as it was my natural involvement within the trajectory of my migratory path to the Big Apple Neither was I having an out of body experience that spirited me from Jamaica to London then whisked me off to Toronto on a tidal wave and finally being carried aloft by a big silver bird that landed me in the New York slab dab in the middle of the Civil Rights struggle It was a vast struggle then and remains so today though on a higher level as still a living breathing a phenomenon that in the 1960 s had elicited a mad rush of water to ooze from fire hoses manned by assiduous if not sadistic law and order protagonists that swept their fellow American brethren off their feet and tossed them several yards from the offending fray

Automatic milking, a better understanding A. Meijering,H. Hogeveen,C.J.A.M. de Koning,2023-08-28 In 2000 the book Robotic Milking reflecting the proceedings of an International Symposium which was held in The Netherlands came out At that time commercial introduction of automatic milking systems was no longer obstructed by technological inadequacies Particularly in a few west European countries systems were being installed at an increasing rate However it was recognised that the changeover from traditional to automatic milking affected the farming operation herd management and control of milk quality profoundly and that many of the implications were still unknown So new challenges in various fields of dairy farming and new research areas emerged Since this previous International Symposium much has happened In general automatic milking has been adopted as a realistic alternative for milking in the traditional milking parlour Systems have gradually been improved and maybe even more importantly farmers have become more familiar with their potential and limitations both technically and in herd management The number of farms milking with an automatic milking system has worldwide increased to more than 2 200 by the end of 2003 From 2000 to now the level of scientific knowledge on various aspects and consequences of automatic milking has increased largely as well because of research efforts all over the world A significant share of these efforts has been made within the framework of a EU granted project on the implications of the introduction of automatic milking on dairy farms Some seven research institutes and six industrial companies from six countries joined their expertise and experience in order to facilitate a widespread adoption of automatic milking without undesirable side effects This book reflects the knowledge on automatic milking generated all over the world in the last few years Its contents can therefore be regarded as the present state of knowledge in the field of automatic milking for a better understanding
