What is a Parent Andrew Bainham, Shelley Day Sclater, Martin Richards, 1999-07-01 This collection of essays is the product of a series of seminars held at the University of Cambridge in 1998 under the auspices of the newly formed Cambridge Socio Legal Group The book presents an interdisciplinary exploration of the nature of parenthood and its various manifestations in contemporary society It is divided into three sections dealing respectively with defining parenthood new issues in contemporary parenting and parenting post divorce Each contributor addresses the central question What is a Parent from the perspective of his or her own discipline thus bringing together ideas about parents derived from law sociology psychology biology and criminology Despite the familiar and apparently obvious answer to this question the notion of parent emerges from the analysis as a contested concept Definitions are various and fluid parenting practices are by no means fixed and ideologies which frame who parents are and what they do are subject to disruptions from several quarters In short the essays in this book show the ways in which parent like child is a term with a shifting meaning and parenthood refers to a fluid set of social practices which are historically and culturally situated Contributors Andrew Bainham Carol Brayne Stuart Bridge Rachel Cook Shelley Day Sclater Margaret Ely Loraine Gelsthorpe Susan Golombok Jack Goody Jonathan Herring Felicia Huppert Allison James Martin Johnson Bridget Lindley Mavis Maclean Juliet Mitchell Ros Pickford Martin Richards Wendy Solomou Candida Yates

Understanding Aerodynamics Doug McLean, 2012-12-26 Much needed fresh approach that brings a greater insight into the physical understanding of aerodynamics Based on the author's decades of industrial experience with Boeing this book helps students and practicing engineers to gain a greater physical understanding of aerodynamics Relying on clear physical arguments and examples McLean provides a much needed fresh approach to this sometimes contentious subject without shying away from addressing real aerodynamic situations as opposed to the oversimplified ones frequently used for mathematical convenience Motivated by the belief that engineering practice is enhanced in the long run by a robust understanding of the basics as well as real cause and effect relationships that lie behind the theory he provides intuitive physical interpretations and explanations debunking commonly held misconceptions and misinterpretations and building upon the contrasts provided by wrong explanations to strengthen understanding of the right ones Provides a refreshing view of aerodynamics that is based on the author's decades of industrial experience yet is always tied to basic fundamentals Provides intuitive physical interpretations and explanations debunking commonly held misconceptions and misinterpretations Offers new insights to some familiar topics for example what the Biot Savart law really means and why it causes so much confusion what Reynolds number and incompressible flow really mean and a real physical explanation for how an airfoil produces lift Addresses real aerodynamic situations as opposed to the oversimplified ones frequently used for mathematical convenience and omits mathematical details whenever the physical understanding can be conveyed without them
