in Extreme Context George B. Graen,Joan A. Graen,2013-03-01 The proper balance of managerial administrative control and managerial team leadership depends upon the work context After organizational procedures are designed by work process engineers managers and their directreports in the business units are charged to save our ship SOS by their employers Their ships their business units often were built for calm seas Unfortunately turbulent seas may happen unexpectedly and stress their ships and crews Under extreme conditions the sea may put their ships squarely in harm s way If they are not well prepared their chances of survival are few and none This book is about managing and being managed under conditions of extreme contexts where only the special teams survive and prosper Leading Contemporary Organizations Amy L. Fraher,2020-05-28 Why do organizations fail What hinders otherwise responsible leaders from recognizing looming disasters What prevents well intentioned people from responding properly to an emerging crisis Using systems psychodynamics to analyze an array of international crises Amy L Fraher explores ethical challenges at Silicon Valley

tech companies the Wall Street implosions that led to the 2008 financial industry crash and a wide range of social crises policy failures and natural disasters offering a crisis management philosophy applicable in diverse settings Rather than viewing crises as anomalies that cannot be anticipated Fraher persuasively argues that crises can and should be embraced as naturally occurring by products of any organization s change management processes If leaders do not proactively manage organizational change they will inevitably manage crisis instead This accessible textbook will appeal to business students and researchers studying leadership change and crisis as well as progressive minded business leaders keen to improve their own organizations

Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The *Encyclopedia of the Sciences of Learning* provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the *Encyclopedia* provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The *Encyclopedia* also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences

The Next Crash Amy L.

Fraher,2014-05-13 If you are one of over 700 million passengers who will fly in America this year you need to read this book The Next Crash offers a shocking perspective on the aviation industry by a former United Airlines pilot Weaving insider knowledge with hundreds of employee interviews Amy L Fraher uncovers the story airline executives and government regulators would rather not tell While the FAA claims that this is the Golden Age of Safety and other aviation researchers assure us the chance of dying in an airline accident is infinitesimal The Next Crash reports that 70 percent of commercial pilots believe a major airline accident will happen soon Who should we believe As one captain explained Everybody wants their 99 ticket but you don't get Captain Sully for ninety nine bucks Drawing parallels between the 2008 financial industry implosion and the post 9 11 airline industry The Next Crash explains how aviation industry risk management processes have not kept pace with a rapidly changing environment To stay safe the system increasingly relies on the experience and professionalism of airline employees who are already stressed fatigued and working more while earning less As one copilot reported employees are so distracted it's almost a miracle that there wasn't bent metal and dead people at his airline Although opinions like this are pervasive for reasons discussed in this book employees issues do not concern the right people namely airline executives aviation industry regulators politicians watchdog groups or even the flying public in the right way often enough In contrast to popular notions that airliner accidents are a thing of the past Fraher makes clear America is entering a period of unprecedented aviation risk

Unconventional Methodology in Organization and Management Research Alan Bryman,David A. Buchanan,2018-03-02 Most researchers in organization and management studies stick to two or three traditional research methods like surveys and interviews Sticking with the familiar is seen as a safe bet and innovation is discouraged by academic incentives and rewards But research participants are now suffering from survey fatigue and using the same old methods runs the risk of generating the same old findings This book describes twelve unconventional methodologies in organization and management research These include unconventional research settings and data sources unconventional research designs and data collection methods unconventional analytic approaches and designs and methods that exploit new technology developments The aim is to encourage dialogue and experimentation with regard to the development of innovative unconventional approaches to organization and management research Several commentators have criticized the way in which research methods have become more formulaic and have argued for greater diversity in research approaches The methodological perspective that we adopt shapes our interpretation of the information that we gather Different methods generate different kinds of information leading to different ways of understanding the phenomena that we are investigating Our methods influence our styles of theorizing ways of thinking and reasoning and forms of writing and reporting research This book will be of value to academic researchers in organization and management studies Doctoral candidates and Masters students on MBA and similar programmes

Mistakes, Errors and Failures across Cultures Elisabeth Vanderheiden,Claude-Hélène Mayer,2020-03-14 This volume provides comprehensible strength based perspectives

on contemporary research and practice related to navigating mistakes errors and failures across cultures It addresses these concepts across cultural contexts and explores any or all of these three concepts from a positive psychology or positive organisational perspective highlighting their potential as resources The volume further discusses the consequences of errors and failures at individual organisational and societal levels ranging from severe personal problems to organisational and collective crises perspectives how those can be turned into opportunities for contingent and sustainable improvement processes The book shows that there are significant cultural differences in the understanding interpretation and handling of errors and failures This volume provides practical guidance for transcultural understanding of mistakes errors and failure through new models ideas for self reflection therapeutic and counselling interventions and organisational change management processes This book is a must for researchers and practitioners working on mistakes errors and failures across cultures and disciplines

A Critical Public Relations Approach to Crisis Communication and Management Huabin Wang, 2022-10-19 This book proposes a critical public relations approach to analyzing crisis communication with Malaysia Airlines flight 370 MH370 disappearance 2014 2018 as a case study It examines the discursive process of Malaysia s crisis response and image building tracing Malaysia Airlines during the immediate response and the Malaysian establishment until the official suspension of the underwater search The study features a critical discourse analysis of 84 national media texts and 85 response statements focusing on three aspects the national media representations of Malaysia s image the national carrier and the government s rhetorical strategies of delivering stances and actions and the dynamic process of image reconstruction and national recovery The present project contributes to the current research area by integrating both linguistic and public relations perspectives and more importantly by highlighting the ideological impact instead of merely behavioral effectiveness in modern communication research Target readers may find their interest in corporate crisis communication critical inquiry about political public relations and the MH370 incident in general

Handbook of Research on Activating Middle Executives' Agency to Lead and Manage During Times of Crisis Wilmot, Ann-Marie, Thompson, Canute Sylvester, 2022-06-24 The role of lead executives is demanding under normal circumstances but more so during times of institutional crisis The existence of ongoing internal organizational crises plus crises triggered by external events and shocks requires that leaders and managers be equipped with the tools to manage such crises Therefore further study is required that considers the difficulties of leading various organizations as well as best practices for future management The Handbook of Research on Activating Middle Executives Agency to Lead and Manage During Times of Crisis is a comprehensive reference source that offers practical applications tools and skills to equip middle leaders to meaningfully participate in crisis management and resolution in institutions for improved outcomes and discusses a multi pronged framework for building middle leaders crisis response efficacies The book also invites top tier educational and industry practitioners to reflect on how they have led during times of crisis Covering topics such as mentoring coping strategies and sustainable development

this major reference work is ideal for educational leaders managers business owners human resource professionals scholars
