Tax law changes at a startling rate not only does societal change bring with it demands for change in the tax system but changes in the political climate will force change as will many other competing pressures With this pace of change it is easy to focus on the practical and forget the core underpinnings of the tax system and their philosophical justifications Taking a pause to remind ourselves of those principles and how they can operate in the modern tax system is crucial to ensuring that

the tax system does not diverge too far from what it should be or could be It is essential to understand the answers to some of the seemingly basic questions that surround tax before we can even begin to think about what a tax system should look like This collection brings together major themes and difficult questions in the philosophical foundations of tax law The chapters consider practical issues such as justification enforcement design and mechanics and provide a full and coherent analysis of the basis for tax law Philosophical Foundations of Tax Law allows the reader to consider how tax systems should move forward in the modern world with a sound philosophical basis to provide the practical tax system that the state requires and citizens deserve

Castells in Africa Muller, Johan, Cloete, Nico, 2017-11-28 Castells in Africa Universities and Development collects the papers produced by Manuel Castells on his visits to South Africa and publishes them in a single volume for the first time The book also publishes a series of empirically based papers which together display the multifaceted and far sighted scope of his theoretical framework and its fecundity for fine grained detailed empirical investigations on universities and development in Africa Castells in his afterword to this book always looking forward assesses the role of the university in the wake of the upheavals to the global economic order He decides the university's function not only remains but is more important than ever This book will serve as an introduction to the relevance of his work for higher education in Africa for postgraduate students reflective practitioners and researchers Includes two previously unpublished public lectures and an Afterword by Manuel Castells

Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode, 2021-08-09 Value added tax VAT is a mainstay of revenue systems in more than 160 countries Because consumption is a more stable revenue base than other tax bases VAT is less distorting and hence more likely to encourage investment savings optimum labor supply decisions and growth VAT is not without criticism however and faces its own specific technical and policy challenges This book the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies offers authoritative perspectives on VAT's full spectrum from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality The contributors leading tax practitioners and academics examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book including revenue generation and revenue efficiency single rate versus multiple rates susceptibility to fraud exemptions and exceptions compliance cost for businesses policy and compliance gaps in revenue collection adjustment rules caused by the transactional nature of the tax transfer pricing issues treatment of vouchers permanent establishments and holding companies payment of refunds cross border digital transactions and supplies for free or below cost price The second part offers six country reports on New Zealand Japan China Colombia Ethiopia and India to demonstrate the different ways in which VAT operates in a variety of national economies Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and

causes minimal distortions This invaluable book serves as an expert guide to VAT policy development in this area It will be welcomed not only by concerned government officials but also by tax professionals both lawyers and accountants and academics in tax law

The Emerging Middle East Financial Markets Henry T. Azzam, 2015-08-28 The book aims to unravel the potentials of Middle East financial markets which are spread over a large and wealthy part of the world These markets are gradually being opened for international investors seeking diversification and rewarding risk adjusted returns However opening up to international investors is a necessary but not a sufficient condition to attract institutional money needed to provide depth and professionalism to these markets Without a cultural shift towards more transparency better regulations and governance and the availability of custody clearance and equity research up to international best practice not much institutional money will be forthcoming to the region Funding sources in the Middle East and North Africa Region are still predominantly channeled through the banking system with equity and fixed income markets playing a marginal role While the worlds financial markets show on average a balanced structure of bank assets stock market capitalization and debt securities the capital mix in the region is heavily skewed towards bank assets with a share of 58.8% equities around 34% and debt securities bonds and Sukuk 7.2% Stock markets of the UAE and Qatar have recently been upgraded to emerging market status which together with Egypt are the only three Arab countries that have selected listed companies featuring in the Morgan Stanley Capital Index for Emerging Markets MSCI EM Saudi Arabia has opened its stock market to direct investment by foreign financial institutions in the second half of 2015 The opening of the Saudi stock market is a major positive development for the regions capital markets The path ahead for MENA finance has become now clearer The relative weight of commercial banks in the financial system will diminish gradually and a wider range of financial services will be provided by deeper and increasingly more sophisticated debt and equity capital markets in line with worldwide trends Sharia compliant products such as Sukuk are expected to continue to grow at double digit rate to meet the strong demand generated regionally and internationally
