Innovations in WASH Impact Measures Evan Thomas, Luis Alberto Andrés, Christian Borja-Vega, Germán Sturzenegger, 2018-02-14 The new 2030 Agenda for Sustainable Development includes water sanitation and hygiene WASH at its core A dedicated Sustainable Development Goal SDG 6 declares a commitment to ensure availability and sustainable management of water and sanitation for all Monitoring progress toward this goal will be challenging direct measures of water and sanitation service quality and use are either expensive or elusive However reliance on household surveys poses limitations and likely overstated progress during the Millennium Development Goal period In Innovations in WASH Impact Measures Water and Sanitation Measurement Technologies and Practices to Inform the Sustainable Development Goals we review the landscape of proven and emerging technologies methods and approaches that can support and improve on the WASH indicators proposed for SDG target 6 1 by 2030 achieve universal and equitable access to safe and affordable drinking water for all and target 6 2 by 2030 achieve access to adequate and equitable sanitation and hygiene for all and end open defecation paying special attention to the needs of women and girls and those in vulnerable situations Although some of these technologies and methods are readily available other promising approaches require further field evaluation and cost reductions Emergent technologies methods and data sharing platforms are increasingly aligned with program impact monitoring Improved monitoring of water and sanitation interventions may allow more cost effective and measurable results

In many cases technologies and methods allow more complete and impartial data in time to allow program improvements Of the myriad monitoring and evaluation methods each has its own advantages and limitations Surveys ethnographies and direct observation give context to more continuous and objective electronic sensor data Overall combined methodologies can provide a more comprehensive and instructive depiction of WASH usage and help the international development community measure our progress toward reaching the SDG WASH goals
