Literary Subterfuge and Contemporary Persian Fiction Mohammad Khorrami, 2014-09-25 The main focus of Literary Subterfuge and Contemporary Persian Fiction is to identify components and elements which define Persian modernist fiction placing an emphasis on literary concepts and devices which provide the dynamics of the evolutionary trajectory of this modernism The question of who writes Iran refers to a contested area which goes beyond the discipline of literary criticism Non literary discourses have made every effort to impose their committed readings on literary texts they have even managed to exert influence on the process of literary creation In this process inevitably many works or segments of them and many concepts which do not lend themselves to such readings have been ignored at the same time many of them have been appropriated by these discourses Yet components and elements of Persian literary tradition have persistently engaged in this discursive confrontation mainly by insisting on literature's relative autonomy so that at least concepts such as conformity and subterfuge essential in terms of defining modern and modernist Persian fiction could be defined in a literary manner Proffering an alternative in terms of literary historiography this book supports a methodological approach that considers literary narratives which occur in the margins of dominant discourses and indeed promote non discursivity as the main writers of Persian modernist fiction It is an essential resource for scholars and researchers interested in Persian and comparative literature as well as Middle Eastern Studies more broadly

Book Production Adrian Bullock, 2012-08-06 The digital revolution has brought with it a wider range of options for creating and producing print on paper products than ever seen before With the growing demand for skills and knowledge with which to exploit the potential of digital technology comes the need for a comprehensive book that not only makes it possible for production staff editors and designers to understand how the technology affects the industry they work in but also provides them with the skills and competencies they need to work in it smartly and effectively This book is designed to satisfy this need Book Production falls into two parts The first part deals with the increasingly important role of production as project managers a role which has not been adequately written about in any of the recent literature on publishing The second part deals with the processes and raw materials used in developing and manufacturing print on paper products Case studies are used to illustrate why and how some processes or raw materials may or may not be appropriate for a particular job With expert opinions and case studies and a consideration of the practices and issues involved this offers a comprehensive overview of book production for anyone working or training to work in or in conjunction with the books industry
