The increasing popularity of genre blends or fiction that straddles the traditional labels means greater pleasure for readers but a greater challenge for readers advisory. In this informative and entertaining book McArdle gets library staff up to speed on these engaging titles showing how such crossover fiction appeals to fanbases of multiple genres. Complete with booklists, summaries, read-alikes, and thorough indexes, this guide covers suspense, fantasy, historical fiction, horror, mystery, romance, and science fiction, as well as non-genre titles that don't neatly fit into any categories. Offers guidance for shelving, displaying, and marketing genre blends. Shows how to make the most of online discovery tools in cataloging these titles. Includes Blend MVPs, a section spotlighting several popular authors who regularly move between genres, and a useful bibliography of additional resources. Providing a unique look at how common genres are often combined, this guide will open up new worlds of fiction to readers, advisors, and those whom they serve. **Literary**

Studies and Human Flourishing James F. English, Heather Love, 2023 The Humanities and Human Flourishing series publishes edited volumes that explore the role of human flourishing in the central disciplines of the humanities and whether and how the humanities can increase human happiness. The contributors to this volume of essays investigate the question: what do literary scholars contribute to social scientific research on human happiness and flourishing? Of all humanities disciplines, none is more resistant to the program of positive psychology or the prevailing discourse of human flourishing than literary studies. The approach taken in this volume of essays is neither to gloss over that antagonism nor to launch a series of blasts against positive psychology and the happiness industry. Rather, the contributors reflect on how their literary research work, to which they are personally committed, might become part of an interdisciplinary conversation about human flourishing. The contributors' areas of research are wide-ranging, covering literary aesthetics, book history, digital humanities, and reader reception, as well as the important interdisciplinary fields of gender and sexuality studies, disability studies, and black studies, fields in which issues of stigma and exclusion are paramount and which have critiqued the discourse of human flourishing for its failure to grapple with structural inequality and human difference. Literary scholars are drawn more readily to the problematic than to the decidable, but by dwelling on the trouble spots in a field of inquiry still largely confined to the sciences, *Literary Studies and Human Flourishing* provides the groundwork for new and more productive forms of interdisciplinary collaboration and exchange. Crash Course in Readers' Advisory Cynthia Orr, 2014-12-05 One of the key

services librarians provide is helping readers find books they'll enjoy. This crash course will furnish you with the basic practical information you need to excel at readers advisory (RA) for adults and teens. The question, "can you recommend a good book?" can be one of the most daunting you face, notwithstanding the fact that recommender tools are ubiquitous. Often, uncertainty arises because although librarians are called on to perform such services daily, readers advisory is a skill set in which most have no formal training. This guide will remedy that. It is built around understanding books, reading, and readers.

and will quickly show you how to identify reading preferences and advise patrons effectively You ll learn about multiple RA approaches such as genre appeal features and reading interests and about essential tools that can help with RA Plus you ll discover tips to help you keep up with this ever changing field There is no other professional book that covers the full spectrum of skills needed to perform the RA service that is in such great demand in libraries of all kinds Helping readers find what they want is a sure way to serve patrons and build your library s brand You will come away from this easy to understand crash course with the solid background you need to do both
