Three Essays On Marx's Value Theory:

Three Essays on Marx's Value Theory Samir Amin, 2013-10-01 In this slim insightful volume noted economist Samir Amin returns to the core of Marxian economic thought Marx's theory of value He begins with the same question that Marx along with the classical economists once pondered how can every commodity including labor power sell at its value on the market and still produce a profit for owners of capital While bourgeois economists attempted to answer this question according to the categories of capitalist society itself Marx sought to peer through the surface phenomena of market transactions and develop his theory by examining the actual social relations they obscured The debate over Marx's conclusions continues to this day Amin defends Marx's theory of value against its critics and also tackles some of its trickier aspects He examines the relationship between Marx's abstract concepts such as socially necessary labor time and how they are manifested in the capitalist marketplace as prices wages rents and so on He also explains how variations in price are affected by the development of monopoly capitalism the abandonment of the gold standard and the deepening of capitalism as a global system Amin extends Marx's theory and applies it to capitalism's current trajectory in a way that is unencumbered by the weight of orthodoxy and unafraid of its own radical conclusions

Global Manifestos for the Twenty-First Century Nicol A. Barria-Asenjo, Brian Willems, Slavoj Žižek, 2023-11-22 Bringing together over forty original short essays some academic others more creative in nature this collection responds to the political historical social and economic situation in which we find ourselves today The editors argue that we are living in a repetition that must be stopped if our goal is that the signifier

humanity remains in the following centuries the time has come to work in the present The objective is not to deliver precise or quick answers but to gather varied voices from different continents bringing together different languages ideas practices theories thoughts and desires In the words of Yanis Varoufakis urging us to become agents of a future that ends unnecessary mass suffering and inspire humanity to realise its potential for authentic freedom To leave the concept of a manifesto open the contradictory aspects of the chapters are a subject of the manifesto itself This is a manifesto of contradictions that reflects our reality as well as our struggles and our aspirations This unique anthology will appeal to students and scholars across the humanities and social sciences interested in critical theory and social change

Modern Imperialism, Monopoly Finance Capital, and Marx's Law of Value Samir Amin, 2018-02-22 The complete collection of Samir Amin's work on Marxism value theory Unlike such obvious forms of oppression as feudalism or slavery capitalism has been able to survive through its genius for disguising corporate profit imperatives as opportunities for individual human equality and advancement But it was the genius of Karl Marx in his masterwork Capital to discover the converse law of surplus value behind the illusion of the democratic supply and demand marketplace lies the workplace where people trying to earn a living are required to work way beyond the time it takes to pay their wages Leave it to the genius of Samir Amin to advance Marx's theories adding to them the work of radical economists such as Michal Kalecki Josef Steindl Paul Baran and Paul Sweezy to show how Marxian theory can be adapted to modern economic conditions Amin extends Marx's analysis to describe a concept of imperialist rent derived from the radically unequal wages paid for the same labor done by people in both the Global North and the Global South the rich nations and the poor ones This is global oligopolistic capitalism in which finance capital has come to dominate worldwide production and distribution Amin also advances Baran and Sweezy's notion of economic surplus to explain a globally monopolized system in which Marx's law of value takes the form of a law of globalized value generating a super exploitation of workers in the Global South Modern Imperialism Monopoly Finance Capital and Marx's Law of Value offers readers in one volume the complete collection of Samir Amin's work on Marxian value theory The book includes texts from two of Amin's recent works Three Essays on Marx's Value Theory and The Law of Worldwide Value which have provoked considerable controversy and correspondence Here Amin answers his critics with a series of letters clarifying and developing his ideas This work will occupy an important place among the theoretical resources for anyone involved in the study of contemporary Marxian economic and political theory

Globalization and the Decline of American Power Cyrus Bina, 2022-11-23 This book explores America's decline as a global power arguing that the implosion of Pax Americana was initiated by the process of globalization preceding the collapse of the Soviet Union by nearly a decade The era of Pax Americana and with it American hegemony is conclusively passed and will not return in current global conditions There is a stark contrast between the present epoch and the postwar era of American hegemony 1945-1979 in which the United States at least outside of the Soviet sphere of influence largely managed the international economy and reigned over international

politics and relations Drawing on both theoretical and empirical evidence this book shows that the era of globalization unleashed forces social political and economic which broke down the status quo of American hegemony Author Cyrus Bina also establishes that since the Iranian Revolution 1979 US involvement throughout the Middle East in Iraq Afghanistan Libya Syria Yemen and now notably in Ukraine has been motivated by the freefall of American hegemony and an attempt to get it back by direct or indirect military force Bina utilizes these contexts for wider analysis and critique of a number of theories commonly used to analyze economy polity geopolitical and dynamics of crisis and social change in capitalism This book will be of great interest to students academics and policymakers on subjects of Economics International Relations Global Studies International Political Economy Political Geography Sociology and postwar History

The Problem of Social Inequality

Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people's life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future

Value Chains Intan

Suwandi, 2019-08-22 Award winning book showcases case studies uncovering the exploitation of labor and class in the Global South Winner of the 2018 Paul M Sweezy Paul A Baran Memorial Award for original work regarding the political economy of imperialism Value Chains examines the exploitation of labor in the Global South Focusing on the issue of labor within global value chains this book offers a deft empirical analysis of unit labor costs that is closely related to Marx's own theory of exploitation Value Chains uncovers the concrete processes through which multinational corporations located primarily in the Global North capture value from the Global South We are brought face to face with various state of the art corporate strategies that enforce economical and flexible production including labor management methods aimed to reassert the imperial dominance of the North while continuing the dependency of the Global South and polarizing the global economy Case studies of Indonesian suppliers exemplify the growing burden borne by the workers of the Global South whose labor creates the surplus value that enriches the capitalists of the North as well as the secondary capitals of the South Today those who control the value chains and siphon off the profits are primarily financial interests with vast economic and political power the power that must be broken if the global working class is to liberate itself Suwandi's book depicts in concrete detail the relations of unequal exchange that structure today's world economy This study up to date and richly documented puts labor and class back at the center of our understanding of the world capitalist system

Fetishism and the Theory of Value Desmond McNeill, 2020-11-12 This book demonstrates the continuing relevance of Marx s critique of the capitalist system in which value is simply equated with market price It includes chapters specifically on the environment and financialisation and presents Marx s qualitative theory of value and the associated concept of fetishism in a clear and comprehensive manner Section I demonstrates how fetishism developed in Marx s writing from a journalistic metaphor to an analytical device central to his critique In Section II commodity fetishism is distinguished from other forms of money capital and interest bearing capital There follows an analysis of Marx s complex attempt to distinguish his argument from that of Ricardo and Samuel Bailey The section ends with a discussion of the ontological status of value as a social rather than a natural phenomenon Section III considers the merits of understanding value by analogy with language and critically assesses the merits of structural Marxism Section IV challenges Marx s emphasis solely on production and considers also exchange and consumption as social relations Section V critically assesses recent Marx inspired literature relating to the two key crises of our time finance and the environment and identifies strong similarities between the key analytical questions that have been debated in each case
