Uninvited Neighbors Herbert G. Ruffin, 2014-03-28 In the late 1960s African American protests and Black Power demonstrations in California's Santa Clara County including what's now called Silicon Valley took many observers by surprise. After all, as far back as the 1890s the California constitution had legally abolished most forms of racial discrimination, and subsequent legal reform had surely taken care of the rest. White Americans might even have wondered where the black activists in the late sixties were coming from because beginning with the writings of Frederick Jackson Turner, the most influential histories of the American West simply left out African Americans or later portrayed them as a passive and insignificant presence. *Uninvited Neighbors* puts black people back into the picture and dispels cherished myths about California's racial history. Reaching from the Spanish era to the valley's emergence as a center of the high tech industry, this is the first comprehensive history of the African American experience in the Santa Clara Valley. Author Herbert G. Ruffin II's study presents the black experience in a new way with a focus on how, despite their smaller numbers and obscure presence, African Americans in the South Bay forged communities that had a regional and national impact disproportionate to their population. As the region industrialized and spawned suburbs during and after World War II, its black citizens built institutions such as churches, social clubs, and civil rights organizations and challenged socioeconomic restrictions. Ruffin explores the quest of the area's black people for the postwar American Dream. The book also addresses the scattering of the black community during the region's late yet rapid urban growth after 1950, which led to the creation of several distinct black suburban communities clustered in metropolitan San Jose. Ruffin treats people of color as agents of their own development and survival in a region that was always multiracial and where slavery and Jim Crow did not predominate but where the white embrace of racial justice and equality was often insincere. The result offers a new view of the intersection of African American history and the history of the American West.

Language and Culture in the Growth of Imperialism Sharron Gu, 2012-09-18 Political science interpretations of international relations tend to focus on abstract terms of economic interest, domination, rights, and justice. Trapped within this limited horizon, the discipline fails to explain why nations of similar economic structure would have variant ideas for their foreign policies and why nations with different economic structures and ideologies could develop a similar global posture during certain periods of their histories. This innovative study examines imperialism from a cultural and linguistic perspective, portraying the rise and fall of ancient Greek, Roman, medieval Islamic, modern British, Russian, and American empires as a part of the natural life of world civilizations. As these imperial cultures matured through centuries of literary accumulation and interaction with other cultures, they finally found their confidence on the world stage and transitioned from an aggressive policy towards others to a more tolerant one.

The Politics of Literature Carl Tighe, 1999 This study of post-war Polish intellectual history analyses the interface between politics and literature under communism. It

suggests that it was not the Catholic Church but the writers of the lay left who were the critics and opponents of Stalinism
