Will Bruder Recent Works Planet Architecture:

Design for a Vulnerable Planet Frederick Steiner, 2011-05-16 We inhabit a vulnerable planet The devastation caused by natural disasters such as the southern Asian tsunami Hurricanes Katrina and Ike and the earthquakes in China's Sichuan province Haiti and Chile as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population have made it clear that business as usual is no longer sustainable We need to find ways to improve how we live on this planet while minimizing our impact on it Design for a Vulnerable Planet sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience Drawing on his own and others experiences across three continents Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection He begins by establishing the foundation for a more ecological approach to planning and design adopting a broad view of ecology as encompassing human and natural urban and wild environments Steiner explores precedents for human ecological design provided by architect Paul Cret landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus the Lake Austin watershed and The Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9/11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities **Words on Cassette, 2002** R R Bowker Publishing, 2002 *Books Out Loud*, 2007

Architecture, 1999 **New Vernacular Architecture** Vicky Richardson, 2001 New Vernacular Architecture considers the synthesis of modernity and tradition in contemporary architecture Focusing on 37 international examples of buildings of different types completed in the last decade it examines architecture that reinterprets rather than revives traditional forms materials and construction techniques The projects covered range from better known works by renowned architects such as Michael Graves Renzo Piano and David Chipperfield to less familiar buildings in Hungary Nepal Latvia and elsewhere The fragmentation of nation states and the greater plurality of political and cultural identities that have occurred over recent years have led to a growing reaction in architecture against global blanding the worldwide homogenization of images and designs As a result local context materials and culture are becoming increasingly important concerns for many architects Architecture has captured the public imagination as a means of lending form to evolving regional identity and as a way of reflecting difference Each project features a thoroughly researched and detailed commentary and is generously illustrated with photographs sketches and plans BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Harvard Design Magazine*, 2004 **Urban Land**, 2006-07 **The Routledge Companion to Smart Design Thinking in Architecture & Urbanism for a Sustainable, Living Planet** Mitra Kanaani, 2024-11-11 This comprehensive

companion surveys intelligent design thinking in architecture and urbanism investigates multiple facets of smart approaches to design thinking that augment the potentials of user experiences as well as his her physical and mental interactions with the built environment Split into six paradigms this volume looks at the theoretical and historical background of smart design smart design methodologies and typologies smart materials smart design for extreme weather and climatic regions as well as climate change issues and side effects smart mobility and the role of digital technologies and simulations in architectural and urban design Often at odds with each other this volume places emphasis on smart design for various typologies and user groups emphasizing on advancements in form making and implementation of technology for healthy and sustainable living environments Written by emerging and established architects planners designers scientists and engineers from around the globe this will be an essential reference volume for architecture and urban design students and scholars as well as those in related fields interested in the implications various facets and futures of smart design **Architectural Record** ,2001
