Winds Of Change Hurricanes And The Transformation Of Nineteenth Century Cuba:

Winds of Change Louis A. Pérez Jr.,2002-11-25 The first book to establish hurricanes as a key factor in the development of modern Cuba *Winds of Change* shows how these great storms played a decisive role in shaping the economy the culture and the nation during a critical century in the island s history Always vulnerable to hurricanes Cuba was ravaged in 1842 1844 and 1846 by three catastrophic storms with staggering losses of life and property Louis Perez combines eyewitness and literary accounts with agricultural data and economic records to show how important facets of the colonial political economy among them land tenure forms labor organization and production systems and many of the social relationships at the core of Cuban society were transformed as a result of these and lesser hurricanes He also examines the impact of repeated natural disasters on the development of Cuban identity and community Bound together in the face of forces beyond their control Cubans forged bonds of unity in their ongoing efforts to persevere and recover in the aftermath of destruction *Winds of*

Hurricanes and Society in the British Greater Caribbean, 1624-1783 Matthew Mulcahy, 2008-08-11 Hurricanes created unique challenges for the colonists in the British Greater Caribbean during the seventeenth and eighteenth centuries These storms were entirely new to European settlers and quickly became the most feared part of their physical environment destroying staple crops and

provisions leveling plantations and towns disrupting shipping and trade and resulting in major economic losses for planters and widespread privation for slaves In this study Matthew Mulcahy examines how colonists made sense of hurricanes how they recovered from them and the role of the storms in shaping the development of the region s colonial settlements Hurricanes and Society in the British Greater Caribbean 1624-1783 provides a useful new perspective on several topics including colonial science the plantation economy slavery and public and private charity By integrating the West Indies into the larger story of British Atlantic colonization Mulcahy s work contributes to early American history Atlantic history environmental history and the growing field of disaster studies

Havana Beyond the Ruins Anke Birkenmaier, Esther Whitfield, 2011-08-10 Looks at portrayals of Havana in literature music and the visual arts in the post Soviet era as the city is reinvented as a destination for international tourists and business ventures

An Environmental History of Latin America Shawn William Miller, 2007-08-27 A narration of the mutually mortal historical contest between humans and nature in Latin America Covering a period that begins with Amerindian civilizations and concludes in the region s present urban agglomerations the work offers an original synthesis of the current scholarship on Latin America s environmental history and argues that tropical nature played a central role in shaping the region s historical development Human attitudes populations and appetites from Aztec cannibalism to more contemporary forms of conspicuous consumption figure prominently in the story However characters such as hookworms whales hurricanes bananas dirt butterflies guano and fungi make more than cameo appearances Recent scholarship has overturned many of our egocentric assumptions about humanity s role in history Seeing Latin America s environmental past from the perspective of many centuries illustrates that human civilizations ancient and modern have been simultaneously more powerful and more vulnerable than previously thought

Hurricanes and the Middle Atlantic States Rick Schwartz, 2007 This reference traces the region s 400 year recorded hurricane history from Jamestown to the present drawing on accounts in newspaper articles books private journals and interviews Emphasizing the human side of a hurricane s aftermath rather than scientific aspects each hurricane account tells how individuals and communities reacted to the storms Storms are profiled in year by year entries from the 1600 s to the current century

The Great Hurricane of 1780 Wayne Neely, 2012-09 The Great Hurricane of 1780 also known as Hurricane San Calixto II is one of the most powerful and deadliest North Atlantic hurricanes on record Often regarded as a cataclysmic hurricane the storm s worst effects were experienced on October 10 1780 In The Great Hurricane of 1780 author Wayne Neely chronicles the chaos and destruction it brought to the Caribbean This storm was likely generated in the mid Atlantic not far from the equator it was first felt in Barbados where just about every tree and house on the island was blown down The storm passed through the Lesser Antilles and a small portion of the Greater Antilles in the Caribbean between October 10 and October 16 of 1780 Because the storm hit several of the most populous islands in the Caribbean the death toll was very high The official death toll was approximately 22 000 people but some historians have put the death toll as high as 27 500 Specifics on the

hurricane s track and strength are unclear since the official North Atlantic hurricane database only goes back as far as 1851 Even so it is a fact that this hurricane had a tremendous impact on economies in the Caribbean and parts of North America and perhaps also played a major role in the outcome of the American Revolution This thoroughly researched history considers the intense storm and its aftermath offering an exploration of an important historical weather event that has been neglected in previous study Climate and Catastrophe in Cuba and the Atlantic World in the Age of Revolution Sherry Johnson,2011 From 1750 to 1800 a critical period that saw the American Revolution French Revolution and Haitian Revolution the Atlantic world experienced a series of environmental crises including more frequent and severe hurricanes and extended drought Drawing **Cuban Studies 33** Lisandro Perez,Uva De Aragon,2003-02-01 Cuban Studies has been published annually by the University of Pittsburgh Press since 1985 Founded in 1970 it is the preeminent journal for scholarly work on Cuba Each volume includes articles in both English and Spanish a large book review section and an exhaustive compilation of recent works in the field The Great African Slave Revolt of 1825 Manuel Barcia Paz,2012-06-06 In June 1825 the Cuban countryside witnessed a large African led slave rebellion a revolt that began a cycle of slave uprisings lasting until the mid 1840s The Great African Slave Revolt of 1825 examines this movement and its participants for the first time highlighting the significance of African warriors in New World plantation society Unlike previous slave revolts led by alliances between free people of color and slaves blacks and mulattoes Africans and Creoles and rural and urban populations only African born men organized the uprising of 1825 From this year onwards Barcia argues slave uprisings in Cuba underwent a phase of Africanization that concluded only in the mid 1840s with the conspiracy of La Escalera a large movement organized by free colored men with ample participation of the slave population The Great African Slave Revolt of 1825 offers a detailed examination of the sociopolitical and economic background of the Matanzas rebellion both locally and colonially Based on extensive primary sources particularly court records the study provides a microhistorical analysis of the days that preceded this event the uprising itself and the days and months that followed Barcia gives the Great African Revolt of 1825 its rightful place in the history of slavery in Cuba the Caribbean and the Americas *Atlantic History* Jack P. Greene,Philip D. Morgan,2008-12-31 Atlantic history with its emphasis on inter regional developments that transcend national borders has risen to prominence as a fruitful perspective through which to study the interconnections among Europe North America Latin America and Africa These original essays present a comprehensive and incisive look at how Atlantic history has been interpreted across time and through a variety of lenses from the fifteenth through the early nineteenth century Editors Jack P Greene and Philip D Morgan have assembled a stellar cast of thirteen international scholars to discuss key areas of Atlantic history including the British Spanish Portuguese Dutch French African and indigenous worlds as well as the movement of ideas peoples and goods Other contributors assess contemporary understandings of the ocean and present alternatives to the concept itself juxtaposing Atlantic history with global hemispheric and Continental history Veracruz

and the Caribbean in the Seventeenth Century Joseph M. H. Clark, 2023-01-19 In the seventeenth century Veracruz was the busiest port in the wealthiest colony in the Americas. People and goods from five continents converged in the city, inserting it firmly into the early modern world's largest global networks. Nevertheless, Veracruz never attained the fame or status of other Atlantic ports. *Veracruz and the Caribbean in the Seventeenth Century* is the first English language book-length study of early modern Veracruz. Weaving elements of environmental, social, and cultural history, it examines both Veracruz's internal dynamics and its external relationships. Chief among Veracruz's relationships were its close ties within the Caribbean. Emphasizing relationships of small-scale trade and migration between Veracruz and Caribbean cities like Havana, Santo Domingo, and Cartagena, *Veracruz and the Caribbean* shows how the city's residents, especially its large African and Afro-descended communities, were able to form communities and define identities separate from those available in the Mexican mainland.

Hurricanes Paul V. Kislow, 2008 A hurricane is a tropical storm with winds that have reached a constant speed of 74 miles per hour or more. Hurricane winds blow in a large spiral around a relative calm centre known as the eye. The eye is generally 20 to 30 miles wide, and the storm may extend outward 400 miles. As a hurricane approaches, the skies will begin to darken, and winds will grow in strength. As a hurricane nears land, it can bring torrential rains, high winds, and storm surges. A single hurricane can last for more than 2 weeks over open waters and can run a path across the entire length of the eastern seaboard. August and September are peak months during the hurricane season that lasts from 1 June to 30 November. This book presents the facts and history of hurricanes.

The Golden Leaf Charlotte Cosner, 2021-04-30 A Choice Reviews Editors' Pick. Through the rise and fall of empires, ideologies, and economies, tobacco grown on the tiny island of Cuba has remained an enduring symbol of pleasure and extravagance. Cultivated as one of the first reliable commodities for those inhabitants who remained after conquistadors moved on in search of a mythical wellspring of gold, tobacco quickly became crucial to the support of the swelling Spanish Empire in the seventeenth and eighteenth centuries. Eventually, however, tobacco became one of the final stabilizing forces in the empire, and it ultimately proved more resilient than the best-laid plans of kings and queens. Tobacco and those whose livelihoods depended on it shrugged off the empire's collapse and pressed on into the twentieth century as an economic force. Any state or political power must reckon with Cosner's exploration of the history of this golden leaf through the personal narratives of farmers, bureaucrats, and laborers all struggling to build an independent and lucrative economic engine. Through conquest, rebellion, colonial and imperial schemes, and the eventual Communist revolution, Cuban tobacco and cigars became a luxury item that commanded loyalty that defied mere borders or embargoes. Ultimately, *The Golden Leaf* is a story of two carefully cultivated products: Cuban tobacco and its lofty reputation.

Natural Disasters in Latin America and the Caribbean June Carolyn Erlick, 2021-02-03 *Natural Disasters in Latin America and the Caribbean: Coping with Calamity* explores the relationship between natural disasters and civil society, immigration, and diaspora communities, and the long-term impact on emotional health. Natural disasters shape history and

society and in turn their long range impact is determined by history and society This is especially true in Latin America and the Caribbean where climate change is increasing the frequency and intensity of these extreme events Ranging from pre Columbian flooding in the Andes to the devastation of Hurricane Maria in Puerto Rico this book focuses on long range recovery and recuperation rather than short term disaster relief Written in the time of the coronavirus pandemic the author shows how lessons learned about civil society governance climate change inequality and trauma from natural disasters have their echoes in the challenges of today s uncertain world This book is well suited to the classroom and will be an asset to students of Latin American history environmental history and historical memory
