

# WinFrog Integrated Navigation Software

WinFrog is a comprehensive real-time integrated navigation, positioning and data acquisition software package that provides solutions for surface and sub-surface marine operations.

## Understanding marine operational requirements

When it comes to offshore operations, one size does not fit all. To stay competitive you need to efficiently meet your clients' specific objectives. Your navigation and positioning solution has to change and adapt with you. Fugro's WinFrog software is designed to be flexible and customized to meet offshore survey, construction, inspection and maintenance applications in the oil & gas, civil and defense sectors.

## WinFrog software product line

Our software engineers specialize in real-time and off-line geomatics applications for data acquisition, processing and management. Since 1994, WinFrog has been the trusted integrated navigation software of choice for sophisticated marine positioning, underwater construction and underwater inspection projects. The WinFrog product line consists of:

- WinFrog
- WinFrog Lite
- WinFrog Remote
- Robot Cable & Pipeline
- WinFrog Seismic Marine
- WinFrog Seismic Marine Lite
- WinFrog Seismic Marine Remote
- WinFrog Seismic Land

## WinFrog

WinFrog combines surface navigation and underwater positioning into one cost-effective package. Its modular design allows customization to meet users' various needs. The core program provides real-time position and navigation, utilizing input from a variety of devices, including GPS, gyros, sounders and USBL. It allows you to define multiple vehicles, each having its own devices, names, offsets, tracks and shapes. In addition, data can be output through industry standard NMEA or customized formats. WinFrog currently supports over 300 different devices through either serial or Ethernet communications.
