Leonardo's Swans Karen Essex,2006-01-10 Isabelle d'Este daughter of the Duke of Ferrara born into privilege and the political and artistic turbulence of Renaissance Italy is a stunning black eyed blond and an art lover and collector Worldly and ambitious she has never envied her less attractive sister the spirited but naive Beatrice until by a quirk of fate Beatrice is betrothed to the future Duke of Milan Although he is more than twice their age openly lives with his mistress and is reputedly trying to eliminate the current duke by nefarious means Ludovico Sforza is Isabella's match in intellect and passion for all things of beauty Only he would allow her to fulfill her destiny to reign over one of the world's most powerful and enlightened realms and be immortalized in oil by the genius Leonardo da Vinci Isabella vows that she will not rest until she wins her true fate and the two sisters compete for supremacy in the illustrious courts of Europe A haunting novel of rivalry love and betrayal that transports you back to Renaissance Italy Leonardo's Swans will have you dashing to the works of the great master not for clues to a mystery but to contemplate the secrets of the human heart **Leonardo on the Human Body**

0815329334 **Learning from Leonardo** Fritjof Capra,2013-11-19 Leonardo da Vinci was a brilliant artist scientist engineer mathematician architect inventor and even musician the archetypal Renaissance man But he was also a profoundly modern man Not only did Leonardo invent the empirical scientific method over a century before Galileo and Francis Bacon but Capra's decade long study of Leonardo's fabled notebooks reveals that he was a systems thinker centuries before the term was coined At the very core of Leonardo's science Capra argues lies his persistent quest for understanding the nature of life His science is a science of living forms of qualities and patterns radically different from the mechanistic science that emerged 200 years later Because he saw the world as an integrated whole Leonardo always applied concepts from one area

to illuminate problems in another His studies of the movement of water informed his ideas about how landscapes are shaped how sap rises in plants how air moves over a bird s wing and how blood flows in the human body His observations of nature enhanced his art his drawings were integral to his scientific studies and he brought art science and technology together in his beautiful and elegant mechanical and architectural designs Capra describes seven defining characteristics of Leonardo da Vinci s genius and includes a list of over forty discoveries he made that weren t rediscovered until centuries later Capra follows the organizational scheme Leonardo himself intended to use if he ever published his notebooks So in a sense this is Leonardo s science as he himself would have presented it Obviously we can t all be geniuses on the scale of Leonardo da Vinci But his persistent endeavor to put life at the very center of his art science and design and his recognition that all natural phenomena are fundamentally interconnected and interdependent are important lessons we can learn from By exploring the mind of the preeminent Renaissance genius we can gain profound insights into how to address the complex challenges of the 21st century *Promethean Ambitions* William R.
