Wilhelm Reich Robert S. Corrington,2003-07-14 Publisher Description

Wilhelm Reich Robert S.

Corrington,2003-07-14 A stirring reappraisal of the brilliant maligned psychoanalytic thinker Robert S Corrington offers the first thorough reconsideration of Wilhelm Reich s life and work since Reich s death in 1957 Reich was seventeen years old at the outbreak of World War I and had already witnessed the suicides of his mother and father A native of Vienna he became a disciple of Freud but by his late twenties having already written his classic *The Function of the Orgasm* he fled the Third Reich and departed too from Freudian psychoanalysis In *The Mass Psychology of Fascism* Reich first took the now classic position that social behavior has its every root in sexual behavior and repression But the psychoanalytic community was made uncomfortable by this claim and it was said by the time of Reich s death in an American prison on dubious charges brought by the federal government that Reich had squandered his prodigal genius and surrendered to his own paranoia and psychosis an opinion still responsible for the neglect and misconception of Reich s contribution to psychology In this transfixing psychobiography Corrington illuminates the themes and obsessions that unify Reich s work and reports on Reich s fascinating unrelenting one man quest to probe the ultimate structures of self world and cosmos **Focus On: 100 Most**

The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves

Post-Enlightenment Life Science, 1800-2010 Sebastian Normandin,Charles T. Wolfe,2013-06-15 Vitalism is understood as impacting the history of the life sciences medicine and philosophy representing an epistemological challenge to the dominance of mechanism over the last 200 years and partly revived with organicism in early theoretical biology The contributions in this volume portray the history of vitalism from the end of the Enlightenment to the modern day suggesting some reassessment of what it means both historically and conceptually As such it includes a wide range of material employing both historical and philosophical methodologies and it is divided fairly evenly between 19th and 20th century historical treatments and more contemporary analysis This volume presents a significant contribution to the current literature in the history and philosophy of science and the history of medicine **Nature's Sublime** Robert S.

Corrington,2013-03-14 Nature s Sublime uses a radical new form of phenomenology to probe into the deepest traits of the human process in its individual social religious and aesthetic dimensions Starting with the selving process the essay describes the role of signs and symbols in intra and interpersonal communication At the heart of the human use of signs is a creative tension between religions symbols and the novel symbols created in the various arts A contrast is made between natural communities which flatten out and reject novel forms of semiosis and communities of interpretation which welcomes creative and enriched signs and symbols The normative claim is made that religious sign symbol systems have a tendency toward tribalism and violence while the various spheres of the aesthetic are comparatively non tribal or even deliberately anti tribal The concept experience of beauty and the sublime is meant to replace that of religious revelation The sublime is

not merely an internal mode of attunement contra Kant but comes from the very depths of nature in the potencies of nature naturing *Riding the Windhorse* Robert S. Corrington, 2003-07-07 In this moving account of his struggles with manic depressive disorder distinguished philosopher Robert S Corrington creator of the school of ecstatic naturalism presents a compelling argument for rethinking the nature of this malady Having inherited the disorder from his mother a gifted actress who struggled with her own form of it until her death he developed crucial survival strategies that he recommends to other sufferers In *Riding the Windhorse* Corrington details the latest medical psychological and spiritual thinking about bipolar disease a disorder characterized by extreme mood swings and responsible for many untimely deaths each year Surprisingly however manic depression is also found in almost all forms of genius and Corrington presents two detailed case studies showing this correlation *Riding the Windhorse* represents one person's eventual triumph over a potentially crippling disease by demonstrating how creativity and the quest for wholeness can support the erratic flight of the windhorse of manic depression Deep Pantheism Robert S. Corrington, 2015-12-09 This book is a study in a new form of religious naturalism called Deep Pantheism which has roots in American Transcendentalism but also in phenomenology and Asian thought It argues that the great divide within nature is that between nature naturing and nature natured the former term defined as Nature creating itself out of itself alone while the latter term defined as The innumerable orders of the World Explorations are made of the connections among the unconscious of nature the archetypes and the various layers of the human psyche The Selving process is analyzed using the work of C G Jung and Otto Rank Evolution and involution are compared as they relate to the Encompassing and the priority of art over most forms of religion is argued for American Aesthetics Walter B.

Gulick, Gary Slater, 2020-05-01 Although there are distinctly American artists Walt Whitman Herman Melville Grandma Moses Thomas Hart Benton and Andy Warhol for example very little attention has been devoted to formulating any distinctively American characteristics of aesthetic judgment and practice This volume takes a step in this direction presenting an introductory essay on the possibility of such a distinctly American tradition and a collection of essays exploring particular examples from a variety of angles Some of the essays in this collection extend pragmatist and process insights about the important place aesthetics has in molding and assessing experience Other essays examine the place of American aesthetics in relation to such particular forms of art as painting literature music and film Three essays attend to the aesthetic aspects of a flourishing life In each of the essays American aesthetics is understood to arise out of deeply felt personal historical and cultural backgrounds Consequently not only are such relatively abstract notions as harmony fit elegance proportion and the like involved in aesthetic judgment but also religious political and social factors become embroiled in aesthetic discernment Thus the ongoing pattern of American aesthetics is shown to be distinguishable from such other varieties of aesthetic thought as analytic aesthetics New Criticism and postmodern approaches to aesthetics **Suffering and Evil in Nature** Joseph E. Healing Cultures edited by Joseph E Harroff and Jea Sophia Oh provides many unique experiments in thinking through the implications of ecstatic naturalism This collection of essays directly addresses the importance of values sustaining cultures of healing and offers a variety of perspectives inducing radical hope requisite for cultivating moral and political imaginings of democracy to come as a regulative ideal Through its invocation of healing cultures the collection foregrounds the significance of the active gerundive and processual nature of ecstatic naturalism as a creative horizon for realizing values of intersubjective flourishing while also highlighting the significance of culture as an always unfinished project of making discursive interpretive and ethical space open for the subaltern and voiceless Each contribution gives voice to the tensions and contradictions felt by living participants in emergent communities of interpretation namely those who risk replacing authoritarian tendencies and fascist prejudices with a faith in future oriented archetypes of healing to make possible truth and reconciliation between oppressor and oppressed victimizers and victims of violence and trauma These essays then let loose the radical hope of healing from suffering in a ceaseless community of communication within a horizon of creative democratic interpretation
