Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa Nojiyeza, Innocent Simphiwe, Mtapuri, Oliver, Bazaanah, Prosper, Netshiozwi, Edzisani Ellen, 2022-01-28 Access to water and sanitation remains a critical challenge in various countries in Africa. The crisis remains the crisis of governance rather than the physical and economic scarcity. In most countries, water is realized as a human right and subsidies are provided for the indigent households. The tricky issue in rural areas remains an issue of access that is often linked to willingness and ability to pay for the installation and daily consumption. The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management IWRM implementation in African countries. It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change. Covering topics such as climate justice, ecological governance and political ecology, this major reference work is a dynamic resource for government officials, sociologists, climate scientists, activists, students and educators of higher education, academicians and researchers in the fields of social sciences, government developmental studies, international relations and political science. Engineers in a Developing Country Rènètte Du Toit, Joan Roodt, 2009 The study provides a demographic analysis of employment trends across the public and private sectors of the economy and investigates the demand for engineers, technologists and technicians in the workforce. A comprehensive analysis of the educational context for engineering professionals focuses on enrolment, graduation and throughput trends in all engineering disciplines at universities and universities of technology and reveals that although there have been positive innovations in education and training strategies in recent years, many issues, especially at secondary school level, remain a challenge. Women in engineering is a particular focus of this study which devotes a chapter to examining the factors that influence their choice of career, the barriers they experience in the labour market and strategies for encouraging women into the profession. This comprehensive monograph offers valuable quantitative and qualitative information about engineering capacity across all engineering disciplines in South Africa. It is therefore an important reference for all engineering academics as well as decision makers in both the private and public sectors and will be useful to aspiring and current engineering students whatever their field. **Civil Engineering**, 2008 Mobile Commerce Applications Nansi Shi, 2004-01-01 Mobile Commerce Applications addresses and explores the critical architectural issues in constructing m-commerce applications and in applying mobile technologies in different areas including methodologies, enabling technologies, models, paradigms, architectures, standards and innovations. **The A to Z of Careers in South Africa**, 2006 Agile Software Development Quality Assurance Stamelos, Ioannis G., Sfetsos, Panagiotis, 2007-02-28 This book provides the research and instruction used to develop and implement software quickly in small iteration cycles and in close cooperation with the customer in an adaptive way, making it possible to react to changes set by the constant changing
