Lux,2016-05-09 Separate Beds is the shocking story of Canada s system of segregated health care Operated by the same bureaucracy that was expanding health care opportunities for most Canadians the Indian Hospitals were underfunded understaffed overcrowded and rife with coercion and medical experimentation Established to keep the Aboriginal tuberculosis population isolated they became a means of ensuring that other Canadians need not share access to modern hospitals with Aboriginal patients Tracing the history of the system from its fragmentary origins to its gradual collapse Maureen K Lux describes the arbitrary and contradictory policies that governed the Indian Hospitals the experiences of patients and staff and the vital grassroots activism that pressed the federal government to acknowledge its treaty obligations A disturbing look at the dark side of the liberal welfare state Separate Beds reveals a history of racism and negligence in health care for Canada s First Nations that should never be forgotten **Classicism and the Construction of Capital Cities** Richard Alston,2025-05-15 Exploring the intriguing interplay between tradition and modernity in the 19th century capitals of London Athens and Rome Richard Alston delves into the political and architectural choices that shaped these cities as representations of self consciously modern nations Politicians and architects invested in classical styles in their efforts to break with traditions and assert new values Classical style was employed to address questions of urbanism and nation citizenship and belonging and history and civilization The story of 19th century architectural Classicism offers a compelling narrative of utopian dreams clashing with authoritarian politics to generate the complexities of modern urban landscapes Through these three case studies this book illuminates how Classicism became a potent tool for expressing elitist nationalism in London excluding Greeks from their own capital in Athens and reinforcing aspiration to a technocratic new Rome As such grand visions collided with modern urban realities Alston unravels the mythic allure and ultimate failure of these utopian endeavours This book presents a riveting exploration of the architectural choices that reflected the aspirations and challenges of a rapidly changing world leaving a lasting impact on the capitals and their nations *Region-Building in Africa* Daniel H. Levine,Dawn Nagar,2016-05-19 This landmark book is the first of its kind to assess the challenges of African region building and regional integration across all five African sub regions and more than five decades of experience considering both political and economic aspects Leading scholars and practitioners come together to analyze a range of entwined topics including the theoretical underpinnings that have informed Africa s regional integration trajectory the political economy of integration

including the sources of different waves of integration in pan Africanism and the reaction to neo liberal economic pressures the complexities of integration in a context of weak states and the informal regionalization that often occurs in borderlands the increasing salience of Africa s relationships with rising extra regional economic powers including China and India and comparative lessons from non African regional blocs including the EU ASEAN and the Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive

Recalibrating teacher training in African higher education institutions Sifiso Sibanda,Gideon (Deon) P. van Tonder,Washington T. Dudu,2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark
