Unpacking and Handling Procedures

WD hard drives are precision instruments and must be handled with care during unpacking and installation. Hard drives can be damaged by rough handling, shock and vibration, or electrostatic discharge (ESD). Be aware of the following precautions:

- Do not unpack your hard drive until you are ready to install it. Your hard drive is packaged in an anti-static bag.
- Handle the hard drive only by the sides. Avoid touching circuit board components on the bottom of the drive.
- To avoid ESD problems, ground yourself by touching the metal chassis of the computer or by wearing a grounding strap before handling the hard drive. Articles of clothing generate static electricity. Do not allow clothing to come in direct contact with the hard drive or circuit board components.
- Do not stack hard drives or stand your WD drive on its edge.
- Do not drop, shake, or knock down the hard drive.
- Save the original packaging materials and antistatic bag in case you need to return your hard drive. Your warranty will be void if your returned drive is shipped in anything other than the original packaging or WD-approved materials.

- Connect the smaller connector on the WD SATA cable to the SATA connector on the motherboard or SATA controller card.

NOTE: If using a SATA controller card, be sure to follow the instructions that came with the card to install SATA host drivers.

SATA Motherboard Configuration

SATA Controller Card Configuration

- Attach the larger end of the WD SATA cable directly to the SATA interface on the back of the WD drive as shown above. SATA connectors are keyed to ensure proper insertion. Also attach the legacy 4-pin power cable.

CAUTION

The WD SATA cable with SecureConnect™ does not supply power to the drive. When using the WD SATA cable, you must also attach the legacy ATA 4-pin power connector to the SATA drive. When using a standard SATA interface cable (not included) instead, DO NOT connect both the standard SATA cable (not included) and legacy ATA 4-pin power cable at the same time or the drive may malfunction.

- Slide the hard drive into an available 3.5-inch drive bay and secure the drive with the four mounting screws (two on each side). For proper grounding, install the screws in the hole positions as shown.
- Verify all cable connections. Replace and secure the system cover. Reconnect the power cord and power up the computer.
- If your WD SATA drive came with a Data Lifeguard Tools™ CD, see "Set Up Your Hard Drive" on the reverse side of this poster to set up your new hard drive.
