Alan Bloomfield, Shirley V. Scott

Whaling In Japan Power Politics And Diplomacy:

Whaling in Japan Jun Morikawa, 2009 For years pro whaling forces and ardent anti whaling organizations in Japan and abroad have wrestled with a contentious and highly emotive issue while proponents of whaling have sought to control the parameters of the debate by limiting it to a discussion of catchphrases such as sustainable use Japan's whaling traditions and whale eating culture Whaling in Japan seeks to broaden the terms of reference by providing a wider objective analytic framework for examining this issue and the political actors and forces in Tokyo the government the bureaucracy and the Institute of Cetacean research that create control and implement Japan's policy and continue to shape the debate Through the encouragement of political myths the manipulation of public opinion and ironically even by using the actions of the anti whaling movement to its own advantage pro whaling forces have created a domestic consensus that allows Tokyo's whaling policies to continue to expand relatively unchallenged even as stockpiles of unsold whale meat build up in Japanese warehouses Whaling in Japan focuses on the gap between the political myths and the reality of Japan's whaling policy and sheds light on seldom discussed aspects of the political and decision making structures that support it Morikawa also examines how Japan has used diplomacy and aid gradually to expand international support for its whaling policies at the International Whaling Commission IWC and considers the longer term future of whaling as environmental awareness grows apace

Norm Antipreneurs and the Politics of Resistance to Global Normative Change Alan Bloomfield, Shirley V. Scott, 2016-10-04 Over recent decades International Relations scholars have investigated norm dynamics processes at some length with the norm entrepreneur concept having become a common reference point in the literature The focus on norm entrepreneurs has however resulted in a bias towards investigating the agents and processes of successful normative change This book challenges this inherent bias by explicitly focusing on those who resist normative change norm antipreneurs The utility of the norm antipreneur concept is explored through a series of case studies encompassing a range of issue areas and contributed by a mix of well known and emergent scholars of norm dynamics In examining the complexity of norm resistance particular attention is paid to the nature and intent of the actors involved in norm contestation the sites and processes of resistance the strategies and tactics antipreneurs deploy to defend the values and interests they perceive to be threatened by the entrepreneurs and whether it is the entrepreneurs or the antipreneurs who enjoy greater inherent advantages This text will therefore be of interest to scholars and students of International Relations International Law Political Science Sociology and History

Japanese Whaling and the People Behind It Nadzeya Shutava, 2024-02-13 This book explores the recent developments in global and Japanese whaling from the viewpoint of the members of the Japanese whaling community a perspective that is largely neglected and misinterpreted Japanese whaling has been one of the most contentious issues in global environmental governance in recent years and Japan is often harshly criticized for its whaling programs By distinguishing between the different whaling related actors and their experiences this book widens our understanding of why

whaling programs continue to exist Rich in ethnographic data the book includes in depth interviews with representatives of the Japanese whaling community from government officials to fishermen shedding light on what whaling represents both historically and today As an ethnographic study of a divisive and controversial subject this book will appeal to a wide range of students and scholars including but not limited to those interested in Japanese studies anthropology political science and ocean resource management

The Japanese Culture of Mourning Whales Mayumi Itoh,2017-12-05 This book provides an in depth study of Japanese whaling culture emphasizing how the Japanese have considered whales and whaling in relation to their understanding of nature and religion It examines why and how the Japanese have mourned the deaths of whales treating them as if they were human beings and assesses the relevance of this culture to nature conservation and management of sustainable use of natural resources It also sheds new light on Japanese whaling one of the most controversial issues in the contemporary world by highlighting the hitherto unknown aspects of Japanese beliefs about whales and whaling which constitute an integral part of their core concept of how they should coexist with nature Through cross examining previous studies of Japanese whaling as well as analyzing new documents and conducting field research on location this book presents a comprehensive survey of Japanese whaling culture and memorial rites for whales and offers viable insights on how the Japanese whaling culture can be applied to solving current global issues including nature conservation management of sustainable use of natural resources and protection of wildlife and its habitats

Handbook of Historical Animal Studies Mieke Roscher,André Krebber,Brett Mizelle,2021-06-08 The handbook provides a comprehensive evaluation of approaches topics and research areas of the rapidly developing field of Historical Animal Studies The so called animal turn specifically inspired new takes on writing history This upsurge in research has led to immense amounts of new empirical studies as well as approaches to historiography which this handbook aims to systemize

People - Marine Mammal Interactions Andrew Butterworth,Mark P. Simmonds,2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some

illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating

Whales and Dolphins Philippa Brakes, Mark Peter Simmonds, 2013-09-13 Whales and dolphins are icons for the conservation movement. They are the most conspicuous ambassadors for entire marine ecosystems and possibly even for the biosphere as a whole. Concurrent with our realisation of impending threats to their environment is a growing scientific understanding of the social and cognitive complexity of many of these species. This book brings together experts in the relevant diverse fields of cetacean research to provide authoritative descriptions of our current knowledge of the complex behaviour and social organization of whales and dolphins. The authors consider this new information in the context of how different human cultures from around the world view cetaceans and their protection including attitudes to whaling. They show how new information on issues such as cetacean intelligence, culture and the ability to suffer warrants a significant shift in global perceptions of this group of animals and how these changes might be facilitated to improve conservation and welfare approaches.

Theology And Science: From Genesis To Astrobiology Joseph Seckbach, Richard Gordon, 2018-12-06 The age old debate between science and faith invites more players to the fore in this book. Proponents of the origin of life as a natural process and natural selection as a mechanism of evolution come face to face with advocates for the intervention of a creator while other scholars believe that the gulf between science and religion should be bridged. At turns disconcerting, revelatory and profound, readers are invited to leave their preconceived notions at the door and join these writers in this curious journey of discovery.

Journal of Peace Research, 2010-11 **NGO Diplomacy** Michele Merrill Betsill, Elisabeth Corell, 2008 Provides an analytical framework for assessing the impact of NGOs on intergovernmental negotiations on the environment and identifying the factors that determine the degree of NGO influence with case studies that apply the framework to negotiations on climate change, biosafety, desertification, whaling and forests. Over the past thirty years, nongovernmental organizations (NGOs) have played an increasingly influential role in international negotiations, particularly on environmental issues. NGO diplomacy has become, in the words of one organizer, an international experiment in democratizing intergovernmental decision making. But there has been little attempt to determine the conditions under which NGOs make a difference in either the process or the outcome of international negotiations. This book presents an analytic framework for the systematic and comparative study of NGO diplomacy in international environmental negotiations. Chapters by experts on international environmental policy apply this framework to assess the effect of NGO diplomacy on specific negotiations on environmental and sustainability issues. The proposed analytical framework offers researchers the tools with which to assess whether and how NGO diplomats affect negotiation processes, outcomes or both, and through comparative analysis the book identifies factors that explain variation in NGO influence, including coordination of strategy, degree of access, institutional overlap and alliances with key states. The empirical chapters use the framework to evaluate the degree of NGO influence on the first phase of the Kyoto Protocol negotiations on global climate change, the Cartagena
