Total Quality Management (TQM) ,1992 **Total Quality Management for Engineers** M Zairi,1991-10-30 Written for practitioners and students with an engineering background this book bridges the gap between their understanding of the techniques of quality control and the wider definition of TQM which is now accepted as a key part of business philosophy Analyzes the relevance of total quality management TQM to changes in the engineering profession in the light of its increased involvement in company practices It presents a broad picture of TQM and its main aspects and explains why it is considered as the major thrust for future competitiveness **Putting Total Quality Management to Work** Marshall Sashkin,1993 Joseph M. Juran John Cunningham Wood,Michael C. Wood,2005 For more than seventy years the teachings and writings of Joseph M Juran have had a profound impact on the quality of the products we buy and use everyday This collection gathers together key material exploring the impact of Juran s ideas *Is Total Quality Management Enough for Competitive Advantage?* Jamal K. Al-Dabal,2001 TQM gurus and consultants market it as the best change initiative that provides organizations with a competitive advantage They also say that it is a cure for all problems that companies face This dissertation provides intellectual and factual data showing that this is not always the case There are areas where TQM provides a needed change initiative along with others In addition once most companies treat improving their processes as a priority TQM ceases to give a competitive advantage since it becomes a basic entry point into the competition The dissertation gives examples showing that contrary to what the consultants propagate 1 It is not a panacea for all problems in organizations and that it fits all types of organizations 2 It is not the only way to give organizations a competitive advantage and 3 TQM s fit for the services sector is discussed with emphasis on customer satisfaction Also covered are some limitations of TQM including empowerment times of paradigm shifts major process changes and reward systems
